

## Topic 1: Getting Started > How to Create a Turnitin Revision Assignment in Blackboard Learn.

The Turnitin tool offers the option to create a Revision Assignment. The Revision Assignment is a handy option that allows students to submit multiple drafts of a paper without overwriting previously submitted work.

Follow the steps below to create a Turnitin assignment:

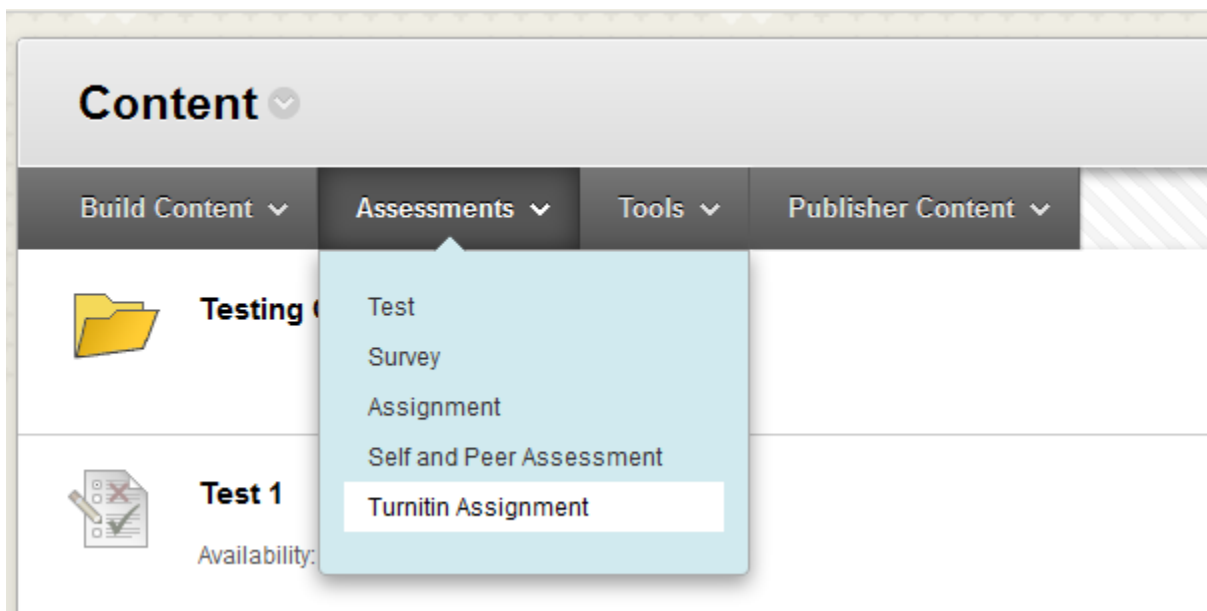

1. Log into Blackboard Learn by going to <http://www.uh.edu/blackboard>.

**NOTE:** If you don't have a Blackboard account, please contact [blackboard@uh.edu](mailto:blackboard@uh.edu) for obtaining instructions on getting your Blackboard Learn account setup.

2. Make sure that you have the Edit Mode turned on.

3. Enter any content page. Content pages are any with the tabs at the top for Build Content, Create Assessment, Add Interactive Tool, and Assign Textbook. From that page, choose the tab for Create Assessment and choose the option for Turnitin Assignment.

4. When you choose this option, a user agreement screen may pop up the first time. You must select that you are at least 13 years of age. Then, hit the button for “I agree—continue.”

user agreement

Our user agreement has been updated. Please read our user agreement below and agree or disagree to its terms and conditions:

Turnitin.com and its services (the "Site" or the "Services") are maintained by iParadigms, LLC ("iParadigms"), and offered to you, the user ("You" or "User"), conditioned upon Your acceptance of the terms, conditions, and notices contained herein without modification (the "User Agreement").  
**You should review this User Agreement carefully before accepting it. If You breach the User Agreement, Your authorization to use the Site will automatically terminate.**

1. Acceptance of Terms  
You accept this User Agreement by using the Services or clicking to

☒ I am at least 13 years of age.  
☐ I am under 13 years of age.

**I agree -- continue**    [I disagree -- logout](#)

5. From this screen, select the option for a Revision Assignment and select Next Step.

turnitin

About this page  
This is the first step in creating an assignment. Use the radio buttons to select an assignment type. Please note a paper assignment must exist before any other assignment type can be created.

Select your assignment type

☐ Paper Assignment  
☐ PeerMark Assignment  
☒ Revision Assignment

**Revision Assignment**  
If the instructor would like students to submit multiple drafts without overwriting the previous drafts/submissions, the instructor can create additional assignments using the revision assignment type. Revision assignments are duplicates of the 'parent' assignment's advanced options and standard settings, but may have new start, due, and post dates.

**Next Step**

6. Select the Turnitin Assignment the Revision Assignment will be based on using the drop-down menu.

**create a new revision assignment**

based on paper assignment

Assignment 1 ▼

7. In the Point Value field, enter the numeric point value that you wish to associate with this assignment.

point value

8. Adjust the dates associated with your assignment using the drop-down menus. The start date and time for the Turnitin assignment is the date when it will become available for students. The due date is the last opportunity your students will have to submit a document for the Turnitin assignment. The post date refers to the date that graded Turnitin assignments become available for viewing by students. When selecting a post date, please select a date that is later than the due date. If you select a post date that is before the due date, you will not be able to create the Turnitin assignment.

start date:	01-Feb-2012	at	10 ▼	:	58 ▼
due date:	08-Feb-2012	at	23 ▼	:	59 ▼
post date:	09-Feb-2012	at	0 ▼	:	00 ▼

NOTE: In Blackboard the post date relates to the availability of GradeMark papers only and has no bearing on when grades are posted to the Blackboard Gradebook.

9. Type any instructions related to the Revision Assignment in the Special Instructions text box.

enter special instructions (optional):

10. Generate Originality Reports for student submissions: There are three choices for this option. Select the one you prefer to use. For our example assignment, we will choose immediately first report is final.

Immediately first report is final: Originality Reports are generated immediately after student submissions. Students cannot resubmit papers once the Originality Report is generated. If you decide to allow resubmission, you must delete student submissions to enable the resubmission functionality.

Immediately (can overwrite reports until due date): Originality Reports are generated immediately after the initial submission by students. Students may resubmit as often as they wish until the assignment due date. Originality Reports for the second or subsequent submission will require a 24 hour delay before the Originality Report begins processing.

NOTE: Previous versions will be removed, and only the latest submission will be available. Student submissions will compare against one another within the assignment on the due date and time. No resubmissions are allowed after the due date and time of the assignment.

On due date: Originality Reports will not be generated for any student submissions until the due date and time of the assignment. Students may resubmit as many times as needed until the due date and time without receiving reports. No resubmissions are allowed after the due date and time of the assignment.

Generate Originality Reports for student submissions

immediately first report is final

11. If you want to allow students to see the Originality Report for their assignment, select the yes option.

Allow students to see Originality Reports?

☐ yes

☒ no

12. If all of your settings are correct, you will click the button to submit the assignment.
