

Student Researchers Wanted

Gain Research Experience in HIV/AIDS Risk-Taking Behavior

Social Science in Young Adult Risk Behavior
& Community Intervention Lab

Are you looking to gain research experience in HIV risk-related behavior research and conducting sexual risk-taking behavior intervention research? Dr. Carmack is currently looking for undergraduate researchers interested in gaining more research experience in this area of behavioral science.

Student Researchers are needed to work on:

- Synthesizing Risk-reduction Intervention Literature: Sexual behavior, Drug and Alcohol use;
- Opportunities to participate in professional conferences to showcase research;
- Facilitation of an Exploratory Risk Reduction study to take place **Summer 2015**;
- Evaluation of the Exploratory Risk Reduction study

If you possess previous experience in these areas or would like to gain experience in these areas, please contact:

Dr. C. Carmack
Department of Psychological, Health, and Learning Sciences
ccarmack@central.uh.edu
Farish Hall, 491

Students studying anthropology, biology, epidemiology, nursing, preventive medicine, psychology, public health, social work, or related fields are preferred. Minimum 3.0 GPA
