      - **Required Approval Steps**
        - The selections of the committee and chair options should follow the approval process of the department and the college of the department or college selected. If at any point it is determined that a required step was skipped, the proposal will be rejected and will need to be regenerated to include all required steps (or, if necessary, exclude steps that are not required).
        - Please note: these selections cannot be changed to affect the workflow once the proposal is launched. If a change is required, the proposal will need to be cancelled and created again.
   b. **Cross-Listing Courses**
      - A cross-listed course is a course that is offered under more than one departmental heading. Cross-listed courses (i.e., courses offered by more than one department) may or may not be assigned the same number in each department in which it is offered. The course will carry identical course attributes (breadth and level) and will have identical course prerequisites. All students who enroll in this course, regardless of the subject listing through which he or she may have enrolled, experience the same course. Students may not receive credit for more than one listing of a cross-listed course. Courses that "meet with" another course (combines courses) are not considered cross-listed courses. All students who enroll in this course, regardless of the subject listing through which he or she may have enrolled, experience the same course.
