

Tariff Classification, Export Control, and Trade Agreements

Visit www.uh.edu/bti/education for course information

This course offers students an in-depth understanding of the global trade facilitation from the GATT to the WTO. Students will evaluate different types of trade agreements implemented by the U.S. government, and the rest of the world. A comparison is provided between free trade (open borders) and protectionism with trade barriers (closed borders). Students will become familiar with the basic concepts of tariffs, and the key principles of strategic thinking, design and negotiations. Upon completion of this course, students will be better prepared to work with the Harmonized Tariff Schedule of the U.S. (HTSUS) and the Export Schedule B, based on the International Harmonized System. The crucial topic of export control will also be covered, with an array of examples of corporate violations, and homeland security risks.
