Executive Summary

Background

The first charter schools were established in the United States in 1991 to provide students with a tuition-free alternative to traditional public schools. Their purpose: to create additional flexibility and innovation in education. Minnesota was the first state to usher in charter schools, and other states quickly followed; charter schools now operate in 46 states and the District of Columbia, Puerto Rico, and Guam. The number of operating charter schools across the nation has more than doubled over the past 17 years—from approximately 3,700 schools in the 2005–06 academic year to approximately 8,000 schools in 2021–22. Student enrollment has also experienced marked growth, increasing from about 1 million students in 2005–06 to nearly 3.7 million students in 2021–22. For the first time since charter schools began, the total number of charter school students recently decreased—from 3,695,769 in 2020–21 to 3,682,526 in 2021–22 (White, 2023).

Texas charter schools were first established in 1995 by the 74th Texas Legislature with the addition of Texas Education Code (TEC) Chapter 12. The state proposed charter schools as a means to improve student learning, increase the choice of learning opportunities within the public school system, create professional opportunities to attract new teachers to the public school system, and encourage different and innovative learning methods (TEC § 12.001, 2024). Texas charter schools are subject to fiscal and academic accountability, though they have fewer regulations than traditional public schools to encourage innovation and flexibility.

Five subchapters within TEC Chapter 12 (2024) codify the different types of charter schools in Texas:

- **Home-rule school district charter schools** (TEC Chapter 12, Subchapter B, § § 12.011-12.030, 2024), which are not in existence to date;
- **Campus or campus program charter schools** (TEC Chapter 12, Subchapter C, § § 12.051-12.065 2024), which are authorized by Texas Independent School District (ISD) school boards and serve students within the district;
- **Open-enrollment charter schools** (TEC Chapter 12, Subchapter D, § § 12.101-12.141, 2024), which are authorized by the commissioner of education (COE), are operated by 501(c)(3) tax-exempt organizations or governmental entities, and can enroll students from any school districts in their approved geographic boundaries;
- **College, university, or junior college charter schools** (TEC Chapter 12, Subchapter E, § § 12.151-12.156, 2024), which are authorized by the COE, are operated by institutions of higher education, and can enroll students from any school districts in their approved geographic boundaries; and
- **Adult high school charter schools** (TEC Chapter 12, Subchapter G, § § 12.251-12.265, 2024), which are authorized by the COE and operated by 501(c)(3) tax-exempt organizations to provide services and instruction below the college level for adults.

Contemporary charter school legislation demonstrates the state’s effort to balance quality with growing charter school demand. In 2013, the 83rd Texas Legislature passed Senate Bill (SB) 2, which made significant changes to the state’s charter school legislation. The bill added TEC §12.115 (a)-(d) (2024)—Charter Revocation or Modification of Governance—to the TEC, which placed charter schools under stricter financial and academic accountability expectations and enacted the requirement that the commissioner revoke a school’s charter should it fail to meet the stated accountability benchmarks for three consecutive years. Since the passage of SB 2 in 2013, 45 charter schools have closed, and the number of charters granted annually has decreased.¹ SB 2 also increased the cap on the maximum number of open-

¹ In previous versions of this report, the number of charter schools reported closed since the passage of SB 2 in 2013 inconsistently counted charter consolidations in the closure number. In some years, consolidations were reported as one charter closure, and in some years, consolidations were counted as multiple closures. The reported number in this report reflects each consolidation as one charter closure (Texas Education Agency, Personal Communication, July 27, 2023).

enrollment charter schools from 215 to 305 by September 2019 (TEC § 12.101, 2024). Another significant change introduced in SB 2 was the transfer of authority in granting open-enrollment charters from the State Board of Education (SBOE) to the COE (TEC § 12.101 (a), 2024). The commissioner must still submit notification to the SBOE regarding which charters are proposed, and the SBOE may veto any new charter proposed within 90 days of the notification of the commissioner’s decision (TEC § 12.101(b-0), 2024). Along with this change, the legislature added a requirement (TEC § 12.1013 (a)-(d), 2024) for a report on the performance of open-enrollment charter school campuses by authorizer type that compares the results of each with matched traditional public school campuses.

In 2017, the 85th Texas Legislature passed SB 1882, providing incentives to school districts to partner with open-enrollment charter schools and certain eligible entities to open campuses within their district.² The bill provided two incentives to promote district partnerships with open-enrollment charter schools and eligible entities. The first was a two-year relief from campus sanctions imposed at schools with low academic performance; the second was access to potentially increased state funding. Both of these benefits incentivized districts to enter into partnerships with outside entities. Also in 2017, the Texas Legislature passed House Bill 21, allowing public charter schools, for the first time in Texas, to receive up to \$60 million in state funding annually for facilities (TEC § 12.106 (d)-(2), 2024).

After a 2020 court ruling that nullified flexible provisions to address low-performing schools, the 87th Texas Legislature passed SB 1365 in 2021 to grant explicit authority for revocation, as well as a specific timeline for particular interventions and sanctions. Included in SB 1365 was language that made clear that *D* ratings in the state’s academic rating system, in addition to *F* ratings, would make schools eligible for closure (TEC § 12.1141(b) and (d), 2024).

Overview of Texas Charter School Campuses

In the 2022–23 academic year, 9,044 Texas public school campuses were in operation. Approximately 11% (1,034) of those campuses were charter school campuses, including ISD-authorized charter school campuses and campuses operated by SBOE-authorized charter schools and COE-authorized charter schools. In 2022–23, most charter school campuses operated under SBOE-authorized charter schools (845).³ Additionally, 129 campuses were ISD-authorized, and 60 campuses operated under COE-authorized charter schools. A total of 470,470 students were enrolled in charter school campuses, representing approximately 9% of the 5,518,169 students enrolled in Texas public schools.

The aggregate performance outcomes presented in this report include 796 campuses operated by SBOE-authorized charter schools, 129 ISD-authorized charter school campuses, and 55 campuses operated by COE-authorized charter schools.⁴

Key Findings for SBOE-Authorized and ISD-Authorized Charter School Campuses

For the purposes of this report, charter schools and their respective campuses are categorized by their original authorizer. Campus or campus program charter schools are reported as ISD-authorized. Open-enrollment and college, university, or junior college charter school campuses are reported as SBOE-authorized or COE-authorized, depending on the year in which the charter schools were authorized; the COE replaced the SBOE as the state charter authorizer for open-enrollment charter schools in 2013. Since then, campus expansions for charters originally authorized by the SBOE are approved by the COE. To date, Texas does not have any home-rule school district charter schools on which to report. These

² SB 1882 Texas partnership schools are classified as ISD-authorized charter schools for the purposes of this report.

³ The 845 campuses associated with SBOE-authorized charter schools include campuses approved by the COE through the approval of expansion amendment requests to add new campuses under existing charter schools originally authorized by the SBOE.

⁴ Residential treatment facilities (RTFs) at charter school campuses (SBOE-authorized charter schools n=49; COE-authorized charter schools n=5) and RTFs at traditional public school campuses (n=72), as well as traditional public school disciplinary alternative education programs (n=145) and traditional public school juvenile justice alternative education programs (n=143) are not included in the performance outcome reporting.

findings—comparing SBOE-authorized and ISD-authorized charter school campuses with matched traditional public school campuses—include aggregate outcome measures related to attrition; State of Texas Assessments of Academic Readiness (STAAR®) exams; graduation rates; and college, career, and military readiness (CCMR).

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023.⁵ The attrition rates for this report, along with the numerators and denominators, were provided by the Texas Education Agency (TEA) for all active campuses for the 2022–23 school year.

SBOE-authorized charter school campuses reported higher attrition compared with their matched traditional public school campuses overall (24% vs. 21%) and at each school level: 23% vs. 22% at elementary school campuses; 24% vs. 19% at middle school campuses; and 26% vs. 19% at high school campuses. ISD-authorized charter school campuses also reported higher attrition than matched traditional public school campuses overall (24% vs. 20%). Attrition at ISD-authorized elementary charter school campuses was lower than matched traditional elementary public school campuses (22% vs. 23%) and was higher at middle school campuses (19% vs. 17%) and high school campuses (30% vs. 18%) than matched traditional public school campuses.

STAAR Results

Analyzed in this report are the percentages of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-Reading Language Arts (RLA) and STAAR-Mathematics exams taken by elementary and middle school students in Grades 3–8, the STAAR Algebra I end-of-course (EOC) exam taken by middle and high school students, and the STAAR English I and English II EOC exams taken by middle and high school students.^{6,7}

At SBOE-authorized charter school campuses, 69% of students taking the STAAR-Mathematics exams and 80% of students taking the STAAR Algebra I EOC exam met the Approaches Grade Level standard, compared with 71% and 84%, respectively, at matched traditional public school campuses. Lower percentages of students achieved the Masters Grade Level standard on STAAR-Mathematics exams (15% vs. 17%) and the STAAR Algebra I EOC exam (20% vs. 29%) at SBOE-authorized charter school campuses compared with matched traditional public school campuses. For the STAAR-RLA/English Language Arts (ELA) exams, a higher percentage of students in Grades 3–8 at SBOE-authorized charter school campuses achieved the Approaches Grade Level standard on the STAAR-RLA exams (79% vs. 75%) than students at matched traditional public school campuses, and the same percentage of students achieved the Approaches Grade Level standard on the STAAR English I EOC exam (73%), and STAAR English II EOC exam (74%) as students at matched traditional public school campuses. A higher percentage of students at SBOE-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-RLA exams (23% vs. 22%) and lower percentages achieved the Masters Grade Level standard on the STAAR English I EOC exam (13% vs. 16%) and STAAR English II EOC exam (8% vs. 10%) compared with matched traditional public school campuses.

At ISD-authorized charter school campuses, 63% of students achieved the Approaches Grade Level standard on STAAR-Mathematics exams, compared with 68% of students at matched traditional public school campuses, and 80% of students achieved the Approaches Grade Level standard on the STAAR Algebra I EOC exam, compared with 84% at matched traditional public school campuses. A lower percentage of students at ISD-authorized charter school campuses achieved the Masters Grade Level

⁵ See Appendix A for a detailed description of the attrition analysis.

⁶ The Approaches Grade Level standard is a STAAR performance level indicating that the student is likely to succeed in the next grade or course with targeted academic intervention. The Approaches Grade Level standard serves as the state's passing standard.

⁷ A more difficult achievement level to attain, the Masters Grade Level standard is a STAAR performance level descriptor indicating that the student is expected to succeed in the next grade or course with little or no academic intervention.

standard on STAAR-Mathematics exams (12% vs. 13%) and a higher percentage achieved the Masters Grade Level standard on the STAAR Algebra I EOC exam (19% vs. 16%) than matched traditional public school campuses. For STAAR-RLA exams, 71% of students achieved the Approaches Grade Level standard at ISD-authorized charter school campuses, compared with 73% of students at matched traditional public school campuses. For the STAAR English I exam, 76% of students achieved the Approaches Grade Level standard at ISD-authorized charter school campuses, compared with 67% of students at matched traditional public school campuses. For the English II EOC exam, 78% of students achieved the Approaches Grade Level standard at ISD-authorized charter school campuses, compared with 70% of students at matched traditional public school campuses. Higher percentages of students at ISD-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-RLA exams (19% vs. 18%), the STAAR English I EOC exam (13% vs. 10%), and the STAAR English II EOC exam (9% vs. 6%) than students at matched traditional public school campuses.

Graduation Rates

SBOE-authorized charter school campuses evaluated under standard accountability provisions had a four-year longitudinal graduation rate of 96%, compared with matched traditional public school campuses, which had a rate of 93%. The four-year longitudinal graduation rate at ISD-authorized charter school campuses evaluated under standard accountability provisions was 91%, compared with 90% at matched traditional public school campuses. Additionally, four-year longitudinal graduation rates for campuses evaluated under alternative education accountability (AEA) provisions were examined; the graduation rate at SBOE-authorized charter school campuses was 78%, compared with 100% at their matched traditional public school campuses. For ISD-authorized charter school campuses evaluated under AEA provisions, the graduation rate was masked due to the limited number of schools (one) operating under these provisions and was thus ineligible for this analysis; the rate for matched traditional public school campuses was 100%.

College, Career, and Military Readiness Outcomes

Under TEC § 39.053(c) (2024), for accountability purposes, high school graduates can demonstrate readiness for college, a career, or the military through a number of achievements outlined in detail in Appendix A.

SBOE-authorized charter school campuses reported higher percentages of graduates on three CCMR outcomes compared with their matched traditional public school campuses: 46% of graduates met Texas Success Initiative (TSI) college readiness benchmarks in both RLA and mathematics, compared with 42% from matched traditional public school campuses; 29% of graduates met the criterion score on an Advanced Placement (AP) or International Baccalaureate (IB) exam in any subject, compared with 18% from matched traditional public school campuses; and 6% of special education students graduated under an advanced diploma plan, compared with 4% from matched traditional public school campuses. For all other CCMR outcomes, matched traditional public school campuses reported higher percentages of CCMR graduates.⁸

ISD-authorized charter school campuses reported the same or higher percentages of graduates for all except one CCMR outcome when compared with their matched traditional public school campuses. A lower percentage of graduates from ISD-authorized charter school campuses completed Individualized Education Program (IEP) and workforce readiness (1% vs. 2%) than matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public school campuses reported equal percentages of graduates meeting the criterion score on an AP or IB exam in any subject area (18%) and earning a Level I or Level II certificate in any workforce education area (1%). For all other CCMR outcomes, ISD-authorized charter school campuses reported higher percentages than matched traditional public school campuses.

⁸ Per the [TEA 2023 Accountability Manual](#) (page 10; PDF e-page 14): The military enlistment indicator is scheduled to return for 2024 accountability standards based on a new data collection as explained in the [September 8, 2022, "To The Administrator Addressed" correspondence](#).

Key Findings for COE-Authorized Charter School Campuses

Aggregate outcome measures related to attrition and STAAR exams were reported for COE-authorized charter school campuses and matched traditional public school campuses. Because of the small number of COE-authorized charter school campuses, aggregate outcome measures related to graduation rates and CCMR outcomes were not reported.

Attrition Rates

The attrition rate for COE-authorized charter school campuses was 32%, compared with 24% at their matched traditional public school campuses.

STAAR Results

Analyzed in this report are the percentages of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-RLA and STAAR-Mathematics exams taken by elementary and middle school students in Grades 3–8, the STAAR Algebra I EOC exam taken by middle and high school students, and the STAAR English I and English II EOC exams taken by middle and high school students.

At COE-authorized charter school campuses, lower percentages of students achieved the Approaches Grade Level standard on STAAR-Mathematics exams (66% vs. 69%) and the STAAR Algebra I EOC exam (77% vs. 84%) than students at matched traditional public school campuses. Lower percentages of students at COE-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-Mathematics exams (13% vs. 16%) and the STAAR Algebra I EOC exam (17% vs. 27%) than students at matched traditional public school campuses. For the STAAR-RLA exams, a higher percentage of students at COE-authorized charter school campuses achieved the Approaches Grade Level standard (77% vs. 73%) and lower percentages achieved the Approaches Grade Level standard on the STAAR English I EOC exam (75% vs. 80%) and STAAR English II EOC exam (76% vs. 78%) than students at matched traditional public school campuses. A higher percentage of students at COE-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR-RLA exams (22% vs. 19%), and lower percentages achieved the Masters Grade Level standard on the STAAR English I EOC exam (13% vs. 18%) and STAAR English II EOC exam (10% vs. 11%) than students at matched traditional public school campuses.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for comparison of school types. While a combination of sampling techniques was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small number of campuses in each category.

Because of the award of new charters and the expansion of existing charters, this report should be carefully compared with previously published *Texas Charter Authorizer Accountability* reports. In 2012, the state of Texas introduced a new standardized test, STAAR. Over the years since this annual report began, STAAR passing standards have been phased-in or modified, administration has been suspended due to the COVID-19 pandemic (2019–20), exam participation was below normal rates (2020–21), and STAAR was redesigned and changed entirely to online administration (2022–23). In addition, a new A–F accountability rating system was introduced in 2018–19 for campuses and continues to evolve. The changes over the years to the STAAR testing and changes to the accountability system should be taken into consideration when comparing the results of this report to previous reports.

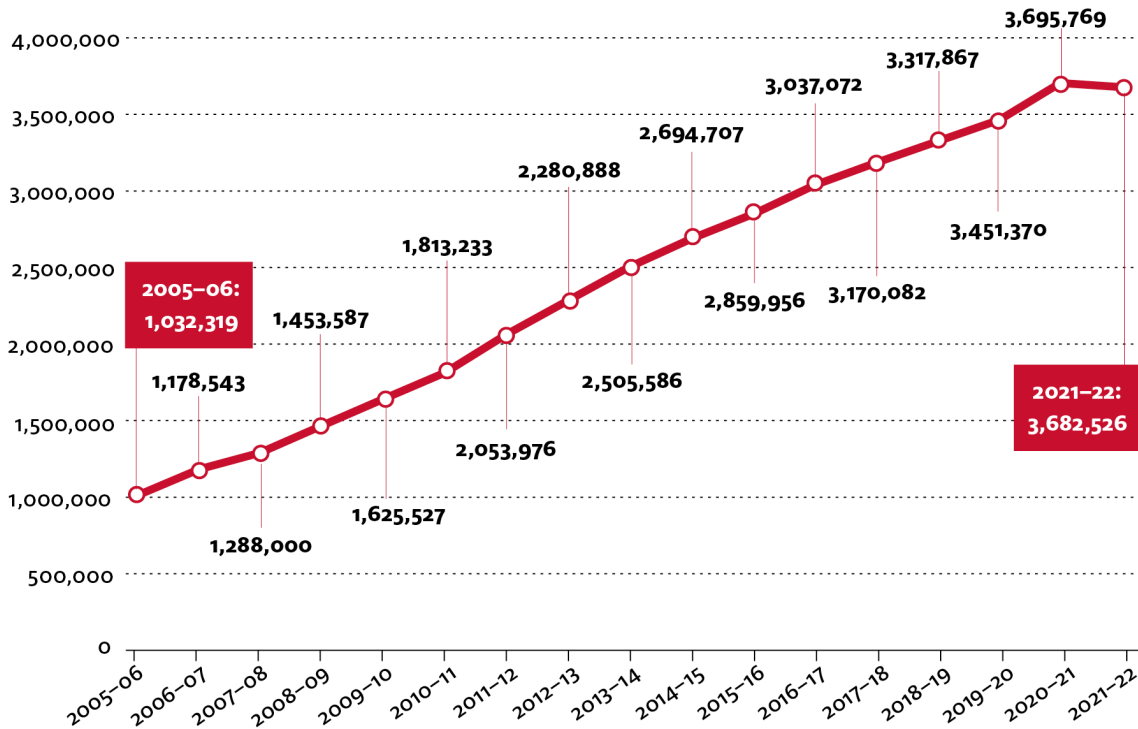

Section 1: Introduction

National Charter School Overview

The first charter schools were established in the United States in 1991 to provide students with a tuition-free alternative to traditional public schools. Their purpose: to create additional flexibility and innovation in education. Minnesota was the first state to usher in charter schools, and other states quickly followed; charter schools now operate in 46 states and the District of Columbia, Puerto Rico, and Guam. The number of operating charter schools across the nation has more than doubled over the past 17 years—from approximately 3,700 schools in the 2005–06 academic year to approximately 8,000 schools in 2021–22. As shown in Figure 1.1, student enrollment has also experienced marked growth, increasing from about 1 million students in 2005–06 to nearly 3.7 million students in 2021–22. For the first time since charter schools began, the total number of charter school students recently decreased—from 3,695,769 in 2020–21 to 3,682,526 in 2021–22 (White, 2023).

FIGURE 1.1

Number of Students Enrolled in Charter Schools in the United States, 2005–06 to 2021–22

Source. National Alliance for Public Charter Schools, 2024.

Note. The 2021–22 school year data is the most recent available from the National Alliance for Public Charter Schools.

The literature documenting the contribution of charter schools to the quality of the public school system is mixed (Betts & Tang, 2019; Spees & Lauen, 2019; Zimmer et al., 2012). Conducted both nationally and within specific states, there are studies indicating that charter schools are efficient producers of public education outcomes (Wolf et al., 2014), studies that demonstrate the increased learning gains of students enrolled in charter schools (Center for Research on Education Outcomes, 2017; Hoxby & Rockoff,

2004), studies that report the increased performance of nearby traditional public schools following the introduction of charter school competition (Booker et al., 2008; Winters, 2012), and studies that demonstrate improvement in the overall performance of the charter school sector over time (Baude et al., 2020). In contrast, there are also national and state-specific studies that demonstrate little or no significant outcomes for charter school students (Cohodes & Parham, 2021; Gleason et al., 2010; Zimmer et al., 2012), studies that show charter school competition has no effect on the performance of traditional public schools (Bifulco & Ladd, 2006; Han & Keefe, 2020; Uttermarck et al., 2023), studies that highlight wide variations in effect by different charter schools and different student groups (Sass, 2006; Shakeel & Peterson, 2020), and studies that point to charter school policies and practices as mechanisms of selecting only high-performing or highly motivated students (Angrist et al., 2013; Lubienski et al., 2009). In summary, charter school outcomes and effects, like the state policies that govern them, vary widely.

Texas Charter Schools

Texas charter schools were first established in 1995 by the 74th Texas Legislature with the addition of Texas Education Code (TEC) Chapter 12. The state proposed charter schools as a means to improve student learning, increase the choice of learning opportunities within the public school system, create professional opportunities to attract new teachers to the public school system, and encourage different and innovative learning methods (TEC § 12.001, 2024). Texas charter schools are subject to fiscal and academic accountability, though they have fewer regulations than traditional public schools to encourage innovation and flexibility. Texas charter schools grew to serve 470,470 students in 1,034 campuses in the 2022–23 school year (Tables 2.1 and 2.2).

Five subchapters within TEC Chapter 12 (2024) codify the different types of charter schools in Texas:

- **Home-rule school district charter schools** (TEC Chapter 12, Subchapter B, § § 12.011-12.030, 2024), which are not in existence to date;
- **Campus or campus program charter schools** (TEC Chapter 12, Subchapter C, § § 12.051-12.065, 2024), which are authorized by Texas Independent School District (ISD) school boards and serve students within the district;
- **Open-enrollment charter schools** (TEC Chapter 12, Subchapter D, § § 12.101-12.141, 2024), which are authorized by the commissioner of education (COE), are operated by 501(c)(3) tax-exempt organizations or governmental entities, and can enroll students from any school districts in their approved geographic boundaries;
- **College, university, or junior college charter schools** (TEC Chapter 12, Subchapter E, § § 12.151-12.156, 2024), which are authorized by the COE, are operated by institutions of higher education, and can enroll students from any school districts in their approved geographic boundaries; and
- **Adult high school charter schools** (TEC Chapter 12, Subchapter G, § § 12.251-12.265, 2024), which are authorized by the COE and operated by 501(c)(3) tax-exempt organizations to provide services and instruction below the college level for adults.

For the purposes of this report, charter schools and their respective campuses are categorized by their original authorizer. Campus or campus program charter schools are reported as ISD-authorized. Open-enrollment, adult high school charter schools, and college, university, or junior college charter school campuses are reported as State Board of Education (SBOE)-authorized or COE-authorized, depending on the year in which the charter schools were authorized; the COE replaced the SBOE as the state charter authorizer for open-enrollment charter schools in 2013. Since then, campus expansions for charters originally authorized by the SBOE are approved by the COE. To date, Texas does not have any home-rule school district charter schools, thus none were reported.

Like traditional public schools, charter schools are required to implement the Texas Essential Knowledge and Skills (TEKS) standards, and charter school students take the same State of Texas Assessments of Academic Readiness (STAAR®) exams as traditional public school students. Texas charter schools are also held to the same academic accountability as traditional public schools under the Texas Accountability

Rating System. Though all charter schools and traditional public schools are evaluated similarly, important differences exist between open-enrollment charter schools and traditional public schools: Teachers in open-enrollment charter schools must hold a bachelor's degree but are not required to hold a teaching certificate unless they are a special education or bilingual education/English as a second language teacher or the governing body of a charter school has set the qualifications for teachers at a standard above what state law requires. Also, charter school salary schedules are set by each individual charter school board, and charter schools can establish their own class sizes. Open-enrollment charter schools can enroll students from any district within the geographic boundary approved in their charters, and they can choose to deny enrollment for certain disciplinary reasons, as most of the provisions in TEC Chapter 37 (2024) do not apply.

In order to ensure quality in charter schools, the Texas Legislature has increased performance regulations over the years. It has also mandated the closure of charter schools for poor performance and encouraged growth by providing them with access to facilities funding.

Contemporary Texas Charter Legislation

Contemporary charter school legislation demonstrates the state's effort to balance quality with growing charter school demand. In 2013, the 83rd Texas Legislature passed Senate Bill (SB) 2, which made significant changes to the state's charter school legislation. The bill added TEC § 12.115 (a)-(d) (2024)—Charter Revocation or Modification of Governance—to the TEC, which placed charter schools under stricter financial and academic accountability expectations and enacted the requirement that the commissioner revoke a school's charter should it fail to meet the stated accountability benchmarks for three consecutive years. Since the passage of SB 2 in 2013, 45 charter schools have closed, and due to the increased selectivity of the commissioner's process for awarding charters, combined with the SBOE's veto authority, the number of charters granted annually has decreased.⁹ SB 2 also increased the cap on the maximum number of open-enrollment charter schools from 215 to 305 by September 2019 (TEC § 12.101, 2024). Another significant change introduced in SB 2 was the transfer of authority in granting open-enrollment charters from the SBOE to the COE (TEC § 12.101 (a), 2024). The commissioner must still submit notification to the SBOE regarding which charters are proposed, and the SBOE may veto any new charter proposed within 90 days of the notification of the commissioner's decision (TEC § 12.101(b-0), 2024). Along with this change, the legislature added a requirement (TEC § 12.1013 (a)-(d), 2024) for a report on the performance of open-enrollment charter school campuses by authorizer type that compares the results of each with matched traditional public school campuses.

In 2017, the 85th Texas Legislature passed SB 1882, providing incentives to school districts to partner with open-enrollment charter schools and certain eligible entities to open campuses within their district.¹⁰ The bill provided two incentives to promote district partnerships with open-enrollment charter schools and eligible entities. The first was a two-year relief from campus sanctions imposed at schools with low academic performance; the second was access to potentially increased state funding. Both of these benefits incentivized districts to enter into partnerships with outside entities. Also in 2017, the Texas Legislature passed House Bill 21, allowing public charter schools, for the first time in Texas, to receive up to \$60 million in state funding annually for facilities (TEC § 12.106(d)-(2), 2024).

After a 2020 court ruling that nullified flexible provisions to address low-performing schools, the 87th Texas Legislature passed SB 1365 in 2021 to grant explicit authority for revocation, as well as a specific timeline for particular interventions and sanctions. Included in SB 1365 was language that made clear that *D* ratings in the state's academic rating system, in addition to *F* ratings, would make schools eligible for closure (TEC § 12.1141(b) and (d), 2024).

⁹ In previous versions of this report, the number of charter schools reported closed since the passage of SB 2 in 2013 inconsistently counted charter consolidations in the closure number. In some years, consolidations were reported as one charter closure, and in some years, consolidations were counted as multiple closures. The reported number in this report reflects consolidations as one charter closure (TEA, Personal Communication, July 27, 2023).

¹⁰ SB 1882 Texas partnership schools are classified as ISD-authorized charter schools for the purposes of this report.

Purpose of the Report

In accordance with TEC § 12.1013(a)-(d) (2024), the Texas Education Agency (TEA) selected the University of Houston Education Research Center (UH ERC) to prepare a report that compares the performances of the following types of schools: charter school campuses operating under charter schools granted by the SBOE (SBOE-authorized), charter school campuses granted by ISDs (ISD-authorized), charter school campuses operating under charter schools granted by the COE (COE-authorized), and matched traditional public school campuses. This report includes performance data for all charter school campuses operating in the 2022–23 school year, including those operated by charters granted between 1996 and 2012 (Generations 1 through 17) by the SBOE, those granted between 2013 and 2021 (Generations 18 through 26) by the COE, and all charter school campuses authorized by ISDs.¹¹

Data Sources, Definitions, and Research Methods

The data and methods used in this report are intended to present descriptive information for the comparison of charter school campuses with matched traditional public school campuses. While the information presented provides the opportunity for comparison, inferences about the effectiveness of charter schools and matched traditional public schools are outside the scope of this report. A description of report data is provided in the sections that follow, and a summary of methods are further detailed in Appendix A.

Data Sources

The following sources and types of campus-level data were used in this report:

- **Texas Academic Performance Reports:** Publicly available via the TEA website, the Texas Academic Performance Reports disaggregate enrollment and performance results for all Texas public schools by campus, student demographic group, student program, grade level, and subject area. For this report, the 2022–23 campus-level STAAR Assessment Data file, Advanced Data Download reference file, and Profile file were downloaded and combined into one campus-level data file.
- **Texas Accountability Rating System Reports:** The latest Texas Accountability Rating System data were not available for this report. At the time this report was written, the issuance of A through F ratings under the final *2023 Accountability Manual* was pending and subject to change based on the judicial rulings or decisions from the 88th Legislature during a special session.¹² TEA Performance Reporting Division staff provided information on alternative education accountability (AEA) status and campus type—including residential treatment facilities (RTFs), juvenile justice alternative education programs (JJAEPs), and disciplinary alternative education programs (DAEPs).
- **AEA Completion, Graduation, and Dropout Data:** Graduation rate data for AEA campuses was downloaded from the completion, graduation, and dropout data reported on the TEA website (TEA, November 2023). See Appendix A for a detailed description of the graduation rate data.
- **Charter School Authorization Data:** Data regarding the authorizer type, start date, status, and closure date of all charter school campuses were provided by TEA Department of Authorizing.
- **Public Education Information Management System (PEIMS):** The annual attrition rates for this report, along with the numerators and the denominators, were calculated from PEIMS data and provided by TEA for all active campuses for the 2022–23 school year. See Appendix A for detailed information regarding the attrition rate calculation. Data identifying ISD-Authorized charter school campuses were also obtained from PEIMS data and were provided by TEA for this report.

¹¹ Though charter schools were granted in 2022 and 2023 (Generations 27 and 28), they were not in operation for the 2022–23 school year and thus not included in this report.

¹² See the TEA's [October 31, 2023, "To The Administrator Addressed"](#) correspondence for more information regarding the delayed accountability ratings.

Definitions

This section describes variables in the data and key terms used throughout the report.

School Classification Definitions

- **Alternative Education Accountability (AEA):** The specific provisions by which the performance of alternative education campuses is determined and accountability ratings are assigned. AEA campuses have a modified graduation rate calculation for accountability ratings.
- **AEA Provisions:** Alternative performance measures for campuses serving at-risk students were first implemented in the 1995–96 academic year. Over time, these measures have expanded to include charter schools that serve large populations of at-risk students. Accountability advisory groups consistently recommend evaluating these types of campuses by separate AEA provisions because of the large number of students served in alternative education programs on campuses and to ensure these unique campus settings are appropriately evaluated for accountability. To register to be considered under AEA provisions, campuses must meet specific criteria listed in the *2023 Accountability Manual* (TEA, 2023a) or qualify as community-based dropout recovery campuses established in accordance with TEC § 29.081(e) (2024).¹³
- **Charter Authorizer Type:** Charter school campuses are reported by the authorizer that granted the original charter school.
 - **SBOE-Authorized Charter School:** From 1995 to 2012, the SBOE served as the authorizer for open-enrollment and university charter schools. All SBOE-authorized charter school campuses in this report exist under charters originally granted between 1996 and 2012.
 - **ISD-Authorized Charter School:** At times referred to as district charters, district campus charters, or campus charters, ISD-authorized charter schools are under the oversight of the district school board that authorized them. Also under this category are the ISD-authorized charter schools associated with the more recent SB 1882 partnerships.
 - **COE-Authorized Charter School:** In 2013, the COE became the authorizer for open-enrollment and university charter schools. All COE-authorized charter school campuses in this report exist under charters granted after 2012.
- **Disciplinary Alternative Education Program (DAEP):** A system of instruction provided in a setting other than a regular classroom that is located on or off a regular campus, provides for the educational and behavioral needs of students, and provides specialized supervision and counseling for its students.¹⁴
- **Juvenile Justice Alternative Education Program (JJAEP):** A campus operated under the authority of a county juvenile justice board.¹⁵
- **Matched Traditional Public School Campuses:** For the purposes of this report, a combination of sampling techniques was used to identify a set of traditional public school campuses to serve as demographic peers for charter school comparison. The details of the matching procedure are explained in Appendix A.
- **Residential Treatment Facility (RTF):** A live-in private center and program or detention center and correctional facility operated by the Texas Juvenile Justice Department that provides educational services to students who reside in the facility.¹⁶
- **School Level:** Maintaining accordance with the prior *Texas Charter Authorizer Accountability Report* (Templeton et al., 2023), schools are classified as elementary, middle, or high school campuses based on the proportion of students served in each grade level. Schools serving equal proportions of two grade-level types are classified into the higher grade-level category. For example, a school serving 50% of students in kindergarten through Grade 5 and 50% of students in Grades 6–8 is classified as a middle school.
 - **Elementary schools** serve a larger proportion of students in kindergarten through Grade 5,

¹³ Criteria are listed in Chapter 7 of the TEA *2023 Accountability Manual*.

¹⁴ As defined in 19 Texas Administrative Code (TAC) § 103.1201 (2024).

¹⁵ As defined in 37 TAC § 348.102 (9) (2024).

¹⁶ As defined in 12 Texas Human Resources Code § 221.056 (2024).

- **Middle schools** serve a larger proportion of students in Grades 6–8, and
- **High schools** serve a larger proportion of students in Grades 9–12.

Outcome Measure Definitions

- **Attrition Rate:** For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023.¹⁷ The attrition rates for this report were provided by TEA.
- **STAAR Grade 3–8 Exams:** These are the standardized exams given in Grades 3–8. STAAR-Reading Language Arts (RLA) and STAAR-Mathematics exams are administered in Grades 3–8; STAAR-Science exams are administered in Grade 5 and 8; and the STAAR-Social Studies exam is administered in Grade 8. Specifically, this report analyzed the STAAR exams included in the 2022–23 Texas Academic Performance Report. Previous versions of this report included STAAR-Writing exams and reported aggregate performances for Grade 4 and 7. As of the 2021–22 school year, the STAAR-Writing exam became a part of the STAAR-RLA exam, and this report no longer separately displays STAAR-Writing performance.
- **STAAR End-of-Course (EOC) Exams:** STAAR EOC exams are standardized exams administered after the completion of Algebra I, English I, English II, U.S. History, and Biology courses. Typically administered in high school grades, these exams can be given to students below Grade 9 if the student has taken the course. It should be noted that some students could have taken both an EOC exam and a STAAR grade-level exam, as local district policy dictates student action. For example, an eighth-grade student taking Algebra I could have taken both the STAAR Algebra I EOC exam and the STAAR-Mathematics exam for Grade 8. Specifically, this report analyzed the STAAR EOC exams included in the 2022–23 Texas Academic Performance Report.
- **Approaches Grade Level Standard:** The STAAR performance level indicating that the student is likely to succeed in the next grade or course with targeted academic intervention. It serves as the state’s passing standard.¹⁸
- **Masters Grade Level Standard:** The STAAR performance level indicating that the student is expected to succeed in the next grade or course with little or no academic intervention.¹⁹
- **Graduation Rate:** The graduation rate in this report is the class of 2022 longitudinal four-year graduation rate calculated for state accountability purposes; it follows a cohort of first-time Grade 9 students into the fall after their expected graduation date (or, in cases of extended rates, the fall one or two years after their expected graduation date) (TEA, 2023b).²⁰ For schools evaluated under the standard accountability system, the total number of graduates is divided by the total number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the class. For schools evaluated under the AEA system, students who previously dropped out are included in state accountability rate calculations if the students graduate, continue, or receive a Texas Certificate of High School Equivalency. Graduates, continuers, and Texas Certificate of High School Equivalency recipients who previously dropped out (and are not eligible for any other exclusions) are included in the numerator, but not the denominator, of the four-year graduation, continuation, or Texas Certificate of High School Equivalency recipient rate.
- **College, Career, and Military Readiness (CCMR) Outcomes:** Under TEC § 39.053(c) (2022), graduates can demonstrate CCMR for state accountability purposes in several ways. For this report, the following CCMR outcomes are reported for 2022 graduates:^{21, 22}

17 See Appendix A for a detailed description of the attrition analysis.

18 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Approaches Grade Level standard.

19 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Masters Grade Level standard.

20 See the [Secondary School Completion and Dropouts in Texas Public Schools 2021–22 report](#) for more about the calculation of the class of 2022 longitudinal graduation rate.

21 Appendix A describes CCMR outcome measures in detail.

22 Per the [TEA 2023 Accountability Manual](#) (page 10; PDF e-page 14): The military enlistment indicator is scheduled to return for 2024 accountability standards based on a new data collection as explained in the [September 8, 2022, “To The Administrator Addressed” correspondence](#).

- Meeting Texas Success Initiative (TSI) criteria in RLA and mathematics
- Meeting criteria on the Advanced Placement (AP) or International Baccalaureate (IB) examination
- Earning dual course credits
- Earning an industry-based certification
- Earning a Level I or Level II certificate
- Completing and earning credit for an ELA college prep course
- Completing and earning credit for a mathematics college prep course
- Completing an OnRamps dual enrollment course
- Earning an associate degree
- Completing an Individualized Education Program (IEP) and demonstrating workforce readiness
- Being identified as a current special education student with an advanced diploma plan

Research Methods

In order to fulfill the legislative requirements of this report, several analytic methods were employed. Under TEC § 12.1013(a)-(d) (2024), the *Texas Charter Authorizer Accountability Report* must provide an opportunity for the public to compare the performance of SBOE-authorized, ISD-authorized, and COE-authorized charter schools with the performance of matched traditional public school campuses. Specific performance metrics codified under TEC § 39.053(c) (2024) and attrition rates are required to be included in the report, disaggregated by grade level served. Each method is briefly described below and in detail in Appendix A.

School Matching Procedures

In order to fulfill the statutory requirement of identifying a matched group of traditional public school campuses for charter school performance comparison (TEC § 12.1013(b), 2024), TEA selected a combination of sampling techniques as the preferred matching procedure. By identifying traditional public school campuses similar in size, teaching staff, and student characteristics, the matching technique is intended to eliminate bias in performance comparisons due to observed covariates. Appendix A details the matching procedure variables and specifications, and Appendix D details the performance results for each charter school included in the report. RTFs, JJAEPs, and DAEPs were not included in the matching procedure, nor in the performance analyses. RTFs were excluded because the unique student populations served in instructional settings are far different from other schools. JJAEPs and DAEPs were excluded because the performance of their student populations is attributed back to the students' home campuses.

Attrition Analysis

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023. The 2022–23 annual attrition rates for this report, along with the numerators and denominators, were provided by TEA for all active campuses included in this report for the 2022–23 school year. Students enrolled in the fall of 2022 were cross-referenced to their fall enrollment in 2023. Students whose fall 2022 campus was different from their fall 2023 campus or who were not found in any fall 2023 campuses were considered attrited and counted in the numerator of the attrition rate calculation. The denominator of the attrition rate calculation comprised all students enrolled in the fall of the 2022–23 academic year at a particular campus. This calculation was adjusted to account for the grade levels available to students at each campus as well as additional factors. Appendix A details the reasons students were excluded from attrition rate calculations.

Outcome Measure Calculation

For attrition rates, STAAR performance, graduation rates, and CCMR rates, results were calculated using the number of students at each campus in the group that contributed to the outcome measure. Rather than averaging the campus-level rates for all campuses in a group for each metric, numerators and denominators for each metric were summed and then divided to provide an overall rate for the group. This prevents results from being significantly influenced by extreme performance results for very small campuses.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for public comparison of school types. While a combination of sampling techniques was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small number of campuses in each category. Interpretation of results for COE-authorized charter school campuses should take into consideration that all COE-authorized charters in this report were authorized between 2013 and 2021 and thus may have been operating for a shorter amount of time compared with other charter school campuses. As a final note of caution, although the passage of SB 2 in 2013 resulted in the policy process change in charter school authorization, the reader is cautioned against attributing differences presented in this report solely to this change. Rather, differences may be attributable to other changes occurring over time, such as differences in the charter school applicant makeup, other process changes, and/or changes in leadership—none of which could be accounted for within the scope of this report.

Because of the differences in STAAR performance standards, changes to the Texas Accountability Rating System, the award of new charters, and the expansion of existing charters over the years, comparisons with previously published *Texas Charter Authorizer Accountability* reports should be made with caution. In 2012, the state of Texas introduced a new standardized test, STAAR. Over the years since this annual report began, STAAR passing standards have been phased-in or modified, administration has been suspended due to the COVID-19 pandemic (2019–20), exam participation was below normal rates (2020–21), and STAAR was redesigned and changed entirely to online administration (2022–23). In addition, a new A–F accountability rating system was introduced in 2018–19 for campuses and continues to evolve. The changes over the years to the STAAR testing and changes to the accountability system should be taken into consideration when comparing the results of this report to previous reports. Notably, state accountability ratings are not included in this year’s report. At the time of the report’s creation, the issuance and publication of 2023 A through F ratings under the final 2023 rule was pending and subject to change based on judicial rulings or decisions from the 88th Legislature during a special session.

Additionally, each year, new charter school campuses are opened, low-performing charter school campuses are closed, and existing charters are expanded. Thus, *Texas Charter Authorizer Accountability* reports from two different years contain different subsets of charter schools, and results should be compared with caution.²³

Organization of the Report

The rest of the report is organized into five sections. Section 2 provides a description of the charter school and traditional public school campuses disaggregated by school type and school level. Section 3 presents the aggregate performance of SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses. Section 4 disaggregates the performance comparisons presented in Section 3 by school level. Section 5 presents the aggregate performance of COE-authorized charter school campuses and matched traditional public school campuses. Finally, Section 6 discusses the findings of the previous sections and presents a summary of results with a review of the limitations of the study.

Following the main body of the report, several appendices provide additional, detailed information. Appendix A describes the analytical methods used in the creation of the report. Appendix B displays

23 See the [Charter School Reports](#) page of the TEA website for more on the award, expansion, and closure of charter schools.

tables comparing charter school campuses evaluated under AEA provisions. Appendix C presents the performance on STAAR-Science/Biology and STAAR-Social Studies/U.S. History exams for SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses. Appendix D details the performance results for each charter school campus included in the report. And Appendix E, available on the TEA website, includes a list of matched traditional public school campuses included in the report and their outcome measures.

Section 2: Description of Charter School Campuses and Traditional Public Schools

This section of the report describes the distribution of Texas public schools by school type and school level. Table 2.1 displays the types of Texas public school campuses that were in operation during the 2022–23 academic year. There were 9,044 public schools in operation during the year, 11% (1,034) of which were charter school campuses. Among the different charter school authorizers, the SBOE authorized most of the charters in operation. For both charter schools and traditional public schools, RTFs made up a small

TABLE 2.1

Texas Public School Campuses by School Type, 2022–23

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter Not Residential Treatment Facilities	423	157	216	796

Residential Treatment Facilities	6	5	61	72
Total Traditional Public Schools	4,675	1,569	1,766*	8,010*
Total Public School Campuses in Texas	5,214	1,770	2,060*	9,044*

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Notes. There are no ISD-authorized charter school campus residential treatment facilities.

*One campus labeled as both a JJAEP and a Residential Treatment Facility was included in each respective category but was not double counted in the total.

proportion of the total campuses in operation, and more elementary school campuses were in operation than middle schools and high schools.

Student Enrollment

Table 2.2 describes enrollment in Texas public schools by school type. In the 2022–23 academic year, 470,470 students were enrolled in charter school campuses, and 5,047,699 students were enrolled in traditional public schools. Charter school enrollment accounted for approximately 9% of the total public

TABLE 2.2

Student Enrollment in Texas Public School Campuses by School Type, 2022–23

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter Not Residential Treatment Facilities	237,096	66,511	79,082	382,689

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Notes. There are no ISD-authorized charter school campus residential treatment facilities.

*Students enrolled in one campus labeled as both a JJAEP and a Residential Treatment Facility were included in each respective category but were not double counted in the total enrollment.

school population. Following the same patterns of distribution identified in Table 2.1, SBOE-authorized charter school campuses enrolled the overwhelming majority of charter school students.

Table 2.3 summarizes the demographic characteristics of students enrolled in charter school campuses and traditional public school campuses in 2022–23. In traditional public school campuses, Hispanic students were the largest racial or ethnic group (52%), followed by White students (27%), African American students (12%), Asian students (5%), students identified as two or more races (3%), American Indian or Alaska Native students (<1%), and Native Hawaiian or Pacific Islander students (<1%). Charter school campuses followed the same general distribution of racial or ethnic groups, though SBOE- and ISD-authorized charter school campuses enrolled a larger proportion of Hispanic and African American students and a smaller proportion of White students.

With respect to other student characteristics, traditional public school campuses served a student population that was majority economically disadvantaged (61%) with a smaller representation of students at risk of dropping out of school (53%) and emergent bilingual students/English learners (22%). Both SBOE-authorized and ISD-authorized charter school campuses enrolled larger proportions of economically disadvantaged students (72% and 77%, respectively), and SBOE-authorized charter school campuses served a larger proportion of emergent bilingual students/English learners (34%). COE-authorized charter school campuses served smaller proportions of students at risk of dropping out of school (36%) and emergent bilingual students/English learners (15%) than traditional public school campuses. Generally, charter school campuses served smaller populations of students receiving special education services than traditional public school campuses.

Section 3: Aggregate Performance of SBOE-Authorized and ISD-Authorized Charter School Campuses and Matched Traditional Public School Campuses

This section of the report presents a comparison of the aggregate academic outcomes of SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses. It provides results for aggregate outcome measures related to attrition, STAAR exams, graduation rates, and CCMR rates.²⁴ Campuses that did not have sufficient 2022–23 STAAR data to be included in the analytical sample of charter school campuses were excluded from the aggregate performance analysis.

Campuses Included in the Aggregate Performance Analysis

Table 3.1 summarizes the demographic characteristics of SBOE-authorized and ISD-authorized charter school campuses and the matched traditional public school campuses used in the aggregate performance analysis. After employing the purposive sampling technique described in detail in Appendix A, the population of traditional public schools was narrowed to those most similar in demographic characteristics to charter school campuses included in the report. Though the traditional public school campuses matched to SBOE-authorized charter school campuses generally mimicked the characteristics of the SBOE-authorized charter school campuses in the study, the matched traditional public school campuses included smaller proportions of Hispanic students (55% vs. 64%), economically disadvantaged students (68% vs. 72%), and emergent bilingual students/English learners (30% vs. 34%) and larger proportions of White students (19% vs. 11%), Asian students (6% vs. 5%), students identifying as two or more races (3% vs. 2%), students at risk of dropping out of school (58% vs. 56%), and special education students (12% vs. 9%). When the sampling technique was conducted on the subset of traditional public school campuses matched to ISD-authorized charter school campuses, the matched traditional public school campuses served student populations that included smaller proportions of African American students (14% vs. 16%), economically disadvantaged students (76% vs. 77%), and students at risk of dropping out of school (64% vs. 66%) and larger proportions of Asian students (3% vs. 2%), White students (14% vs. 13%), emergent bilingual students/English learners (30% vs. 23%), and students receiving special education services (13% vs. 11%).

²⁴ STAAR EOC exams reported in this section are aggregated performance results of all students taking EOCs and are not limited to only high school students.

TABLE 3.1

Demographic Characteristics of Charter School Campuses and Matched Traditional Public School Campuses That Were Included in Performance Analyses, 2022–23

	SBOE-Authorized Charter School Campuses	Traditional Public School Campuses Matched to SBOE-Authorized Charter School Campuses	ISD-Authorized Charter School Campuses	Traditional Public School Campuses Matched to ISD-Authorized Charter School Campuses
Race/Ethnicity				
African American	17%	17%	16%	14%
American Indian or Alaska Native	<1%	<1%	<1%	<1%
Asian	5%	6%	2%	3%
Hispanic	64%	55%	66%	66%
Native Hawaiian or Pacific Islander	<1%	<1%	<1%	<1%
Two or more races	2%	3%	2%	2%
White	11%	19%	13%	14%
Other Student Characteristics				
At-Risk	56%	58%	66%	64%
Economically Disadvantaged	72%	68%	77%	76%
Emergent Bilingual Student/English Learner	34%	30%	23%	30%
Special Programs				
Special Education	9%	12%	11%	13%
Total Students	382,689	1,021,562	66,381	2,030,843
Number of Schools	796	1,771	129	2,919

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. The number of schools includes the total number of traditional public school campuses matched to State Board of Education (SBOE)-authorized charter school campuses and Independent School District (ISD)-authorized charter school campuses, respectively.

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023. Student attrition rates between the 2022–23 and 2023–24 academic years are displayed for SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses in Figure 3.1. The attrition rate for SBOE-authorized charter school campuses was 24%, compared with 21% at matched traditional public school campuses. The attrition rate for ISD-authorized charter school campuses was 24%, compared with 20% at matched traditional public school campuses.

FIGURE 3.1

Student Attrition Rates Between 2022–23 and 2023–24 by Charter Authorizer Type and Matched Traditional Public School Campuses

Sources: Texas Academic Performance Reports, Texas Education Agency, 2022–23; Public Education Information Management System, Texas Education Agency, 2022–23 and 2023–24.

Note: A total of 780 State Board of Education (SBOE)-authorized charter school campuses, 1,750 traditional public school campuses matched to SBOE-authorized charter school campuses, 125 Independent School District (ISD)-authorized charter school campuses, and 2,878 traditional public school campuses matched to ISD-authorized charter school campuses were included in this attrition analysis.

STAAR Results

This subsection of the analysis provides details on 2022–23 STAAR exam performance for SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses. Figures in this section detail the percentage of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-RLA and STAAR-Mathematics exams (Grades 3–8) and STAAR English I, English II, and Algebra I EOC exams. The Approaches Grade Level standard serves as the state’s passing standard.²⁵ A more difficult achievement level to attain, the Masters Grade Level standard is a STAAR performance level indicating that the student is expected to succeed in the next grade

25 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Approaches Grade Level standard.

or course with little or no academic intervention.²⁶ Performance on STAAR-Science/Biology and STAAR-Social Studies/U.S. History exams can be found in Appendix C.

Figure 3.2 displays the percentage of students achieving the Approaches Grade Level standard on the STAAR-RLA/ELA exams by charter authorizer type and matched traditional public school campuses. A higher percentage of students in Grades 3–8 at SBOE-authorized charter school campuses achieved the Approaches Grade Level standard on the STAAR-RLA exams than students at matched traditional public school campuses (79% vs. 75%), and a lower percentage of students in Grades 3–8 at ISD-authorized charter school campuses achieved the Approaches Grade Level standard on the STAAR-RLA exams than students at matched traditional public school campuses (71% vs. 73%). For the STAAR English I EOC exam, the same percentages of students at SBOE-authorized charter school campuses and matched traditional public school campuses (73%) achieved the Approaches Grade Level standard. A larger percentage of students at ISD-authorized charter school campuses (76% vs. 67%) achieved the Approaches Grade Level standard than students at matched traditional public school campuses. Equal percentages of students at SBOE-authorized charter school campuses and matched traditional public school campuses (74%) achieved the Approaches Grade Level standard on STAAR English II EOC exams, and a larger percentage of students at ISD-authorized campuses (78% vs. 70%) achieved the Approaches Grade Level standard on STAAR English II EOC exams than students at matched traditional public school campuses.

FIGURE 3.2

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-RLA/ELA Exams by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Key. ELA=English Language Arts.

Notes. A total of 623 State Board of Education (SBOE)-authorized charter school campuses and 98 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®)-Reading Language Arts (RLA) analysis, with 1,486 traditional public school campuses matched to SBOE-authorized charter school campuses and 2,390 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 347 SBOE-authorized charter school campuses and 34 ISD-authorized charter school campuses were included in the STAAR English I end-of-course (EOC) analysis, with 256 traditional public school campuses matched to SBOE-authorized charter school campuses and 441 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 290 SBOE-authorized charter school campuses and 27 ISD-authorized charter school campuses were included in the STAAR English II EOC analysis, with 231 traditional public school campuses matched to SBOE-authorized charter school campuses and 389 traditional public school campuses matched to ISD-authorized charter school campuses.

²⁶ See [STAAR Performance Labels and Policy Definitions](#) for more information about the Masters Grade Level standard.

Figure 3.3 shows the percentage of students achieving the Approaches Grade Level standard on the STAAR-Mathematics exams by charter authorizer type and matched traditional public school campuses. Lower percentages of students in Grades 3–8 at SBOE-authorized charter school campuses (69% vs. 71%) and at ISD-authorized charter school campuses (63% vs. 68%) achieved the Approaches Grade Level standard on STAAR-Mathematics exams than students at matched traditional public school campuses. For the STAAR Algebra I EOC exam, a lower percentage of students at SBOE-authorized charter school campuses achieved the Approaches Grade Level standard than students at matched traditional public school campuses (80% vs. 84%), and a higher percentage of students at ISD-authorized charter school campuses achieved the Approaches Grade Level standard than students at matched traditional public school campuses (80% vs. 74%).

FIGURE 3.3

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 622 State Board of Education (SBOE)-authorized charter school campuses and 98 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis, with 1,484 traditional public school campuses matched to SBOE-authorized charter school campuses and 2,390 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 442 SBOE-authorized charter school campuses and 60 ISD-authorized charter school campuses were included in the STAAR Algebra I end-of-course (EOC) analysis, with 511 traditional public school campuses matched to SBOE-authorized charter school campuses and 841 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 3.4 displays the percentage of students achieving the Masters Grade Level standard on the STAAR-RLA/ELA exams by charter authorizer type and matched traditional public school campuses. For STAAR-RLA, a higher percentage of students in Grades 3–8 at SBOE-authorized charter school campuses (23% vs. 22%) and ISD-authorized charter school campuses (19% vs. 18%) achieved the Masters Grade Level standard compared with students at matched traditional public school campuses. At SBOE-authorized charter school campuses, lower percentages of students taking the STAAR English I EOC exam (13% vs. 16%) and students taking the STAAR English II EOC exam (8% vs. 10%) achieved the Masters Grade Level standard than students at matched traditional public school campuses. Larger percentages of students at ISD-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR English I EOC exam (13% vs. 10%) and the STAAR English II EOC exam (9% vs. 6%) than students at matched traditional public school campuses.

FIGURE 3.4

Percent of Students Achieving the Masters Grade Level Standard on the STAAR-RLA/ELA Exams by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Key. ELA=English Language Arts.

Notes. A total of 623 State Board of Education (SBOE)-authorized charter school campuses and 98 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®)-Reading Language Arts (RLA) analysis, with 1,486 traditional public school campuses matched to SBOE-authorized charter school campuses and 2,390 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 347 SBOE-authorized charter school campuses and 34 ISD-authorized charter school campuses were included in the STAAR English I end-of-course (EOC) analysis, with 256 traditional public school campuses matched to SBOE-authorized charter school campuses and 441 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 311 SBOE-authorized charter school campuses and 29 ISD-authorized charter school campuses were included in the STAAR English II EOC analysis, with 232 traditional public school campuses matched to SBOE-authorized charter school campuses and 398 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 3.5 shows the percentage of students achieving the Masters Grade Level standard on the STAAR-Mathematics exams by charter authorizer type and matched traditional public school campuses. For STAAR-Mathematics, lower percentages of students in Grades 3–8 at both SBOE-authorized charter school campuses (15% vs. 17%) and ISD-authorized charter school campuses (12% vs. 13%) achieved the Masters Grade Level standard than students at matched traditional public school campuses. A lower percentage of students at SBOE-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR Algebra I EOC exam than students at matched traditional public school campuses (20% vs. 29%), and a higher percentage of students at ISD-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR Algebra I EOC exam than students at matched traditional public school campuses (19% vs. 16%).

FIGURE 3.5

Percent of Students Achieving the Masters Grade Level Standard on the STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 622 State Board of Education (SBOE)-authorized charter school campuses and 98 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis, with 1,484 traditional public school campuses matched to SBOE-authorized charter school campuses and 2,390 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 442 SBOE-authorized charter school campuses and 60 ISD-authorized charter school campuses were included in the STAAR Algebra I end-of-course (EOC) analysis, with 511 traditional public school campuses matched to SBOE-authorized charter school campuses and 841 traditional public school campuses matched to ISD-authorized charter school campuses.

Graduation Rates

The following subsection of this report compares the graduation rates of SBOE-authorized and ISD-authorized charter school campuses with the graduation rates of matched traditional public school campuses for the class of 2022. For the purposes of this report, the graduation rate reported is the four-year longitudinal graduation rate calculated for state accountability purposes.

Figure 3.6 provides a comparison of the four-year longitudinal graduation rates at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses evaluated under standard accountability provisions. SBOE-authorized charter school campuses had a 96% four-year longitudinal graduation rate, while the matched traditional public school campuses had a 93% four-year longitudinal graduation rate. ISD-authorized charter school campuses had a 91% four-year longitudinal graduation rate compared with 90% at matched traditional public school campuses.

FIGURE 3.6

Grade 9 Four-Year Longitudinal Graduation Rates by Charter Authorizer Type and Matched Traditional Public School Campuses, Evaluated Under Standard Accountability Provisions, Class of 2022

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 149 State Board of Education (SBOE)-authorized charter school campuses, 151 traditional public school campuses matched to SBOE-authorized charter school campuses, 21 Independent School District (ISD)-authorized charter school campuses, and 335 traditional public school campuses matched to ISD-authorized charter school campuses were included in this analysis.

Figure 3.7 shows the four-year longitudinal graduation rates at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses evaluated under AEA provisions for the class of 2022 (see Table B.4 in Appendix B for the demographic characteristics of students attending campuses evaluated under AEA provisions included in this analysis). For schools evaluated under AEA provisions, the graduation rate calculation includes graduates, continuing students, and Texas Certificate of High School Equivalency recipients, including students who previously dropped out of school but returned and achieved these outcomes.²⁷ As shown in the figure, AEA SBOE-authorized charter school campuses had a 78% four-year longitudinal graduation rate, while the matched traditional public school campuses had a 100% four-year longitudinal graduation rate. The number of ISD-authorized charter school campuses evaluated under AEA provisions reporting graduation rates were too small to report in the figure (values for groups of less than 10 schools are masked).

FIGURE 3.7

Grade 9 Four-Year Longitudinal Graduation Rates by Charter Authorizer Type and Matched Traditional Public School Campuses, Evaluated Under Alternative Education Accountability Provisions, Class of 2022

Source. Texas Education Agency (November 2023). Four-Year Graduation and Dropout Data, Class of 2022.

Notes. A total of 91 State Board of Education (SBOE)-authorized charter school campuses, 48 traditional public school campuses matched to SBOE-authorized charter school campuses, one Independent School District (ISD)-authorized charter school campus, and 43 traditional public school campuses matched to the ISD-authorized charter school campus were included in this analysis. *Limited to 100%. Beginning with the 2023 accountability cycle, students who previously dropped out of school are now included in state accountability rate calculations for Alternative Education Accountability (AEA) campuses if the students graduate, continue, or receive a State of Texas Certificate of High School Equivalency (TxCHSE). Graduates, continuers, and TxCHSE recipients who previously dropped out (and are not eligible for any other exclusions) are included in the numerator, but not the denominator, of the longitudinal graduation, continuation, or TxCHSE recipient rate (AEA graduated, continued, or received TxCHSE) calculation if AEA procedures apply.

27 See Appendix A for a detailed description of the graduation rate calculation.

College, Career, and Military Readiness Outcomes

The following subsection compares the percentage of CCMR outcomes at SBOE-authorized and ISD-authorized charter school campuses with their matched traditional public school campuses for graduates in 2022. Table 3.2 displays the performance for each of the CCMR outcomes defined under TEC § 39.053(c) (2022). See Appendix A for a detailed description of CCMR outcome measures.²⁸

- Meeting TSI criteria in RLA and mathematics
- Meeting criteria on the AP or IB examination
- Earning dual course credits
- Earning an industry-based certification
- Earning a Level I or Level II certificate
- Completing and earning credit for an ELA college prep course
- Completing and earning credit for a mathematics college prep course
- Completing an OnRamps dual enrollment course
- Earning an associate degree
- Completing an IEP and demonstrating workforce readiness
- Being identified as a current special education student with an advanced diploma plan

Table 3.2 shows the CCMR outcomes at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses. SBOE-authorized charter school campuses reported higher percentages of graduates on three CCMR outcomes compared with their matched traditional public school campuses: 46% of graduates met TSI college readiness benchmarks in both RLA and mathematics, compared with 42% from matched traditional public school campuses; 29% of graduates met the criterion score on an AP or IB exam in any subject, compared with 18% from matched traditional public school campuses; and 6% of special education students graduated under an advanced diploma plan, compared with 4% from matched traditional public school campuses. For all other CCMR outcomes, matched traditional public school campuses reported higher percentages of CCMR graduates.

ISD-authorized charter school campuses reported the same or higher percentages of graduates for all except one CCMR outcome when compared with their matched traditional public school campuses. A lower percentage of graduates from ISD-authorized charter school campuses completed IEP and workforce readiness (1% vs. 2%) than matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public school campuses reported equal percentages of graduates meeting the criterion score on an AP or IB exam in any subject area (18%) and earning a Level I or Level II certificate in any workforce education area (1%). For all other CCMR outcomes, ISD-authorized charter school campuses reported higher percentages than matched traditional public school campuses.

²⁸ Per the [TEA 2023 Accountability Manual](#) (page 10; PDF e-page 14): The military enlistment indicator is scheduled to return for 2024 accountability standards based on a new data collection as explained in the [September 8, 2022, "To The Administrator Addressed" correspondence](#).

TABLE 3.2

Percent of College, Career, and Military Ready Graduates by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

	SBOE- Authorized Charter School Campuses	Traditional Public School Campuses Matched to SBOE- Authorized Charter School Campuses	ISD- Authorized Charter School Campuses	Traditional Public School Campuses Matched to ISD- Authorized Charter School Campuses
Satisfying the Texas Success Initiative College Readiness Benchmarks in Both Reading Language Arts (RLA) and Mathematics	46%	42%	43%	35%
Meeting Criterion Score on an Advanced Placement or International Baccalaureate Exam in Any Subject Area	29%	18%	18%	18%
Earning College Credit for at Least 3 Credit Hours in RLA or Mathematics or at Least 9 Credit Hours in Any Subject	15%	33%	33%	21%
Earning an Industry-Based Certification	20%	28%	28%	26%
Earning Level I or Level II Certificate in Any Workforce Education Area	0%	1%	1%	1%
Completing and Earning Credit for an English Language Arts College Prep Course	12%	13%	16%	11%
Completing and Earning Credit for a Mathematics College Prep Course	12%	13%	18%	15%
Completing OnRamps Dual Enrollment Course and Qualifying for at Least 3 Hours of College Credit	3%	4%	7%	6%
Earning an Associate Degree While in High School	2%	11%	5%	3%
Completing Individualized Education Program and Workforce Readiness	1%	2%	1%	2%
Under an Advanced Diploma Plan and Identified as a Current Special Education Student	6%	4%	6%	5%

Note. A total of 268 State Board of Education (SBOE)-authorized charter school campuses, 213 traditional public school campuses matched to SBOE-authorized charter school campuses, 25 Independent School District (ISD)-authorized charter school campuses, and 388 traditional public school campuses matched to ISD-authorized charter school campuses were included in this analysis.

Section 4: Aggregate Performance of SBOE-Authorized and ISD-Authorized Charter School Campuses and Matched Traditional Public School Campuses by School Level

Presented in this section of the report are aggregate academic outcomes of SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses by school level.

In accordance with the prior *Texas Charter Authorizer Accountability Report* (Templeton et al., 2023), schools are classified as elementary, middle, or high school campuses based on the proportion of students served in each grade level. Schools serving equal proportions of two grade-level types are classified into the higher grade-level category. For example, a school serving 50% of students in kindergarten through Grade 5 and 50% of students in Grades 6–8 is classified as a middle school.

- **Elementary schools** serve a larger proportion of students in kindergarten through Grade 5,
- **Middle schools** serve a larger proportion of students in Grades 6–8, and
- **High schools** serve a larger proportion of students in Grades 9–12.

This section provides results for aggregate outcome measures related to attrition and STAAR exams.²⁹

29 Graduation and CCMR outcomes are reported for high schools in Section 3.

Attrition Rates Disaggregated by School Level

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023. In Figure 4.1, student attrition rates between the 2022–23 and 2023–24 academic years are displayed by school level for SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses. SBOE-authorized charter elementary school campuses reported a higher attrition rate than their matched traditional public school campuses (23% vs. 22%), as did middle schools (24% vs. 19%) and high schools (26% vs. 19%). ISD-authorized charter elementary school campuses reported a lower attrition rate than their matched traditional public school campuses (22% vs. 23%) and higher attrition rates at the middle school (19% vs. 17%) and high school (30% vs. 18%) levels.

FIGURE 4.1

Student Attrition Rates Between 2022–23 and 2023–24 for Charter School Campuses and Matched Traditional Public School Campuses, by Authorizer Type and School Level

Sources. Texas Academic Performance Reports, Texas Education Agency, 2022–23; Public Education Information Management System, Texas Education Agency, 2022–23 and 2023–24.

Note. The number of State Board of Education (SBOE)-authorized campuses included in the analyses: elementary (n=415); middle (n=151); high (n=214). The number of matched traditional public school campuses for SBOE-authorized charter school campuses included in the analyses: elementary (n=1,217); middle (n=314); high (n=219). The number of Independent School District (ISD)-authorized campuses included in the analyses: elementary (n=75); middle (n=26); high (n=24). The number of matched traditional public school campuses for ISD-authorized charter school campuses included in the analyses: elementary (n=2,027); middle (n=465); high (n=386).

STAAR Results Disaggregated by School Level

When STAAR performance among SBOE-authorized and ISD-authorized charter school campuses is disaggregated at the school level and compared with matched traditional public school campuses, some differences in performance surface. Figure 4.2 displays the percentage of students in elementary schools meeting the Approaches Grade Level standard on STAAR-RLA and STAAR-Mathematics exams. At SBOE-authorized charter elementary school campuses, the same percentage of students in Grades 3–8 achieved the Approaches Grade Level standard on the STAAR-RLA exams (77%) as students at matched traditional public elementary school campuses, and a lower percentage of students achieved the Approaches Grade Level standard on the STAAR-Mathematics exams (70% vs. 74%) than students at matched traditional public elementary school campuses. On both the STAAR-RLA (68% vs. 73%) and STAAR-Mathematics (64% vs. 70%) exams, lower percentages of students in Grades 3–8 at ISD-authorized charter elementary school campuses achieved the Approaches Grade Level standard than at matched traditional public elementary school campuses.

FIGURE 4.2

Percent of Students Achieving the Approaches Grade Level Standard on the 2022–23 STAAR-RLA and STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (Elementary School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 410 State Board of Education (SBOE)-authorized charter school campuses and 64 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses, with 1,148 traditional public school campuses matched to SBOE-authorized charter school campuses and 1,908 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.3 displays the percentage of students in middle schools meeting the Approaches Grade Level standard on STAAR-RLA and STAAR-Mathematics exams. At the middle school level, 80% of students at SBOE-authorized charter middle school campuses achieved the Approaches Grade Level standard on the STAAR-RLA exams, compared with 73% at matched traditional public middle school campuses, and 68% of students at SBOE-authorized charter middle school campuses achieved the Approaches Grade Level standard on the STAAR-Mathematics exams, compared with 65% at matched traditional public middle school campuses. At ISD-authorized charter middle school campuses, 68% of students achieved the Approaches Grade Level standard on STAAR-RLA exams, compared with 74% at matched traditional public middle school campuses, and 61% of students achieved the Approaches Grade Level standard on STAAR-Mathematics exams, compared with 66% at matched traditional public middle school campuses.

FIGURE 4.3

Percent of Students Achieving the Approaches Grade Level Standard on the 2022–23 STAAR-RLA and STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (Middle School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 155 State Board of Education (SBOE)-authorized charter school campuses and 28 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses, with 318 traditional public school campuses matched to SBOE-authorized charter school campuses and 474 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.4 displays the percentage of students in middle schools meeting the Approaches Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. At SBOE-authorized charter middle school campuses, 83% of students achieved the Approaches Grade Level standard on the STAAR English I EOC exam, compared with 95% at matched traditional public middle school campuses. On the STAAR English II EOC exam, 84% of students at SBOE-authorized charter middle school campuses achieved the Approaches Grade Level standard and the number of matched traditional public middle school campuses was too small to report (values for groups of less than 10 schools are masked). The number of ISD-authorized charter middle school campuses reporting performance on the STAAR English I EOC exam was too small to report, but 98% of students at their matched traditional public school campuses met the Approaches Grade Level standard. For the STAAR English II EOC exam, the number of ISD-authorized charter middle school campuses and the number of matched traditional public middle school campuses were too small to report. A lower percentage of students at SBOE-authorized charter middle school campuses achieved the Approaches Grade Level standard on the STAAR Algebra I EOC exam than students at matched traditional public middle school campuses (84% vs. 95%). At ISD-authorized charter middle school campuses and matched traditional public middle school campuses, 95% of students achieved the Approaches Grade Level standard on the STAAR Algebra I EOC exam.

FIGURE 4.4

Percent of Students Achieving the Approaches Grade Level Standard on the 2022–23 STAAR English I, English II, and Algebra I EOC Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (Middle School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 67 State Board of Education (SBOE)-authorized charter school campuses and six Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®) English I end-of-course (EOC) analysis, with 33 traditional public school campuses matched to SBOE-authorized charter school campuses and 46 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 42 SBOE-authorized charter school campuses and four ISD-authorized charter school campuses were included in the STAAR English II EOC analysis, with seven traditional public school campuses matched to SBOE-authorized charter school campuses and nine traditional public school campuses matched to ISD-authorized charter school campuses. A total of 130 SBOE-authorized charter school campuses and 22 ISD-authorized charter school campuses were included in the STAAR Algebra I EOC analysis, with 277 traditional public school campuses matched to SBOE-authorized charter school campuses and 431 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.5 displays the percentage of students in high schools meeting the Approaches Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. For the STAAR English I and STAAR English II EOC exams, lower percentages of students at SBOE-authorized charter high school campuses achieved the Approaches Grade Level standard than students at matched traditional public high schools (68% vs. 72% and 71% vs. 74%, respectively). A higher percentage of students at SBOE-authorized charter high school campuses achieved the Approaches Grade Level standard on the STAAR Algebra I EOC exam than matched traditional public high school campuses (75% vs. 74%). When compared with matched traditional public high school campuses, higher percentages of students at ISD-authorized charter high school campuses achieved the Approaches Grade Level standard on the STAAR English I EOC exam (73% vs. 67%), STAAR English II EOC exam (77% vs. 70%), and STAAR Algebra I EOC exam (73% vs. 69%).

FIGURE 4.5

Percent of Students Achieving the Approaches Grade Level Standard on the 2022–23 STAAR English I, English II, and Algebra I EOC Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (High School Campuses)

Note. A total of 206 State Board of Education (SBOE)-authorized charter school campuses and 22 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®) English I end-of-course (EOC) analysis, with 218 traditional public school campuses matched to SBOE-authorized charter school campuses and 387 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 206 SBOE-authorized charter school campuses and 22 ISD-authorized charter school campuses were included in the STAAR English II EOC analysis, with 222 traditional public school campuses matched to SBOE-authorized charter school campuses and 385 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 204 SBOE-authorized charter school campuses and 22 ISD-authorized charter school campuses were included in the STAAR Algebra I EOC analysis, with 212 traditional public school campuses matched to SBOE-authorized charter school campuses and 382 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.6 shows the percentage of students in elementary schools achieving the Masters Grade Level standard on STAAR-RLA and STAAR-Mathematics exams. At SBOE-authorized charter elementary school campuses, 22% achieved the Masters Grade Level standard on STAAR-RLA exams, compared with 23% at matched traditional public elementary school campuses, and 16% achieved the Masters Grade Level standard on STAAR-Mathematics exams, compared with 21% at matched traditional public elementary school campuses. At ISD-authorized charter elementary school campuses and matched traditional public school campuses, 17% of students achieved the Masters Grade Level standard on STAAR-RLA exams, and 14% of students at ISD-authorized charter elementary school campuses achieved the Masters Grade Level standard on STAAR-Mathematics exams, compared with 15% at matched traditional public elementary school campuses.

FIGURE 4.6

Percent of Students Achieving the Masters Grade Level Standard on the 2022–23 STAAR-RLA and STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (Elementary School Campuses)

Note. A total of 410 State Board of Education (SBOE)-authorized charter school campuses and 64 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses, with 1,148 traditional public school campuses matched to SBOE-authorized charter school campuses and 1,908 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.7 shows the percentage of students in middle schools achieving the Masters Grade Level standard on STAAR-RLA and STAAR-Mathematics exams. Higher percentages of students at SBOE-authorized charter middle school campuses achieved the Masters Grade Level standard on STAAR-RLA (24% vs. 19%) and STAAR-Mathematics (13% vs. 10%) exams than matched traditional public middle school campuses. At ISD-authorized charter middle school campuses, a lower percentage of students achieved the Masters Grade Level standard on STAAR-RLA exams than students at matched traditional public middle school campuses (17% vs. 19%), and the same percentage of students achieved the Masters Grade Level standard on STAAR-Mathematics exams at ISD-authorized charter middle school campuses and matched traditional public middle school campuses (10%).

FIGURE 4.7

Percent of Students Achieving the Masters Grade Level Standard on the 2022–23 STAAR-RLA and STAAR-Mathematics Exams by Charter Authorizer Type and Matched Traditional Public School Campuses (Middle School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 155 State Board of Education (SBOE)-authorized charter school campuses and 28 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses, with 318 traditional public school campuses matched to SBOE-authorized charter school campuses and 474 traditional public school campuses matched to ISD-authorized charter school campuses.

Figure 4.8 shows the percentage of students in middle schools achieving the Masters Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. At SBOE-authorized charter middle school campuses, 19% achieved the Masters Grade Level standard on the STAAR English I EOC exam, compared with 24% at traditional matched public middle school campuses. On the STAAR English II EOC exam, 12% of students at SBOE-authorized charter middle school campuses achieved the Masters Grade Level standard; the number of matched traditional public middle school campuses was too small to report (values for groups of less than 10 schools are masked). The numbers of ISD-authorized charter middle school campuses reporting performances on STAAR English I and English II EOC exams were too small to report; 28% of students at matched traditional public middle school campuses achieved the Masters Grade Level standard on the STAAR English I EOC exam, and 16% achieved the standard on the STAAR English II EOC exam. On the STAAR Algebra I EOC exam, 23% of students at SBOE-authorized charter middle school campuses and 47% of students at matched traditional public middle school campuses achieved the Masters Grade Level standard, whereas 45% of students at ISD-authorized charter middle school campuses and 46% of students at matched traditional public middle school campuses achieved the Masters Grade Level standard.

Note. A total of 206 State Board of Education (SBOE)-authorized charter school campuses and 22 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®) English I end-of-course (EOC) analysis, with 218 traditional public school campuses matched to SBOE-authorized charter school campuses and 387 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 206 SBOE-authorized charter school campuses and 22 ISD-authorized charter school campuses were included in the STAAR English II EOC analysis, with 222 traditional public school campuses matched to SBOE-authorized charter school campuses and 385 traditional public school campuses matched to ISD-authorized charter school campuses. A total of 204 SBOE-authorized charter school campuses and 22 ISD-authorized charter school campuses were included in the STAAR Algebra I EOC analysis, with 212 traditional public school campuses matched to SBOE-authorized charter school campuses and 382 traditional public school campuses matched to ISD-authorized charter school campuses.

Section 5: Aggregate Performance of COE-Authorized Charter School Campuses and Matched Traditional Public School Campuses

Presented in this section of the report is a comparison of the aggregate academic outcomes of COE-authorized charter school campuses with matched traditional public school campuses. It provides results for aggregate outcome measures related to attrition and STAAR exams.³⁰ Campuses that did not have sufficient 2022–23 STAAR data to be included in the analytical sample of charter school campuses were excluded from the aggregate performance analysis. Due to the small number of COE-authorized charter school campuses, aggregate outcome measures related to CCMR and graduation rates are not displayed, and performance is not disaggregated by school type.

Campuses Included in the Aggregate Performance Analysis

Table 5.1 shows the demographic characteristics of students enrolled at COE-authorized charter school campuses and matched traditional public school campuses. The purposive sampling technique described in detail in Appendix A was applied to narrow the subset of traditional public schools to those most closely matched to the demographics of COE-authorized charter school campuses in the study. After purposive sampling, COE-authorized charter school campuses enrolled a lower percentage of African American students (18% vs. 21%), Asian students (4% vs. 5%), Hispanic students (49% vs. 53%), students at risk of dropping out of school (36% vs. 59%), economically disadvantaged students (56% vs. 72%), emergent bilingual students/English learners (15% vs. 29%), and special education students (10% vs. 13%) compared with matched traditional public school campuses. COE-authorized charter school campuses enrolled higher percentages of White students (25% vs. 17%) than matched traditional public school campuses and the same percentages of American Indian or Alaska Native students (<1%), Native Hawaiian or Pacific Islander students (<1%), and students identifying as two or more races (4%) as matched traditional public school campuses.

³⁰ STAAR EOC exams reported in this section are aggregated performance results of all students taking EOCs and are not limited to only high school students.

TABLE 5.1

Demographic Characteristics of COE-Authorized Charter School Campuses and Matched Traditional Public School Campuses That Were Included in Performance Analyses, 2022–23

	COE-Authorized Charter School Campuses	Traditional Public School Campuses Matched to COE-Authorized Charter School Campuses
Race/Ethnicity		
African American	18%	21%
American Indian or Alaska Native	<1%	<1%
Asian	4%	5%
Hispanic	49%	53%
Native Hawaiian or Pacific Islander	<1%	<1%
Two or more races	4%	4%
White	25%	17%
Other Student Characteristics		
At-Risk	36%	59%
Economically Disadvantaged	56%	72%
Emergent Bilingual Student/English Learner	15%	29%
Special Programs		
Special Education	10%	13%
Total Students	18,652	502,473
Number of Schools	55	1,004

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. The number of schools includes the total number of traditional public school campuses matched to commissioner of education (COE)-authorized charter school campuses.

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023. Student attrition rates between the 2022–23 and 2023–24 academic years are displayed for COE-authorized charter school campuses and matched traditional public school campuses in Figure 5.1. COE-authorized charter school campuses had a 32% attrition rate, compared with a 24% attrition rate at matched traditional public school campuses.

FIGURE 5.1

Student Attrition Rates Between 2022–23 and 2023–24 for COE-Authorized Charter School Campuses and Matched Traditional Public School Campuses

Sources. Texas Academic Performance Reports, Texas Education Agency, 2022–23; Public Education Information Management System, Texas Education Agency, 2022–23 and 2023–24.

Note. A total of 52 commissioner of education (COE)-authorized charter school campuses and 993 traditional public school campuses matched to COE-authorized charter school campuses were included in this analysis.

STAAR Results

Analyzed in this section of the report are the percentages of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-RLA and STAAR-Mathematics exams taken by elementary and middle school students in Grades 3–8 and the STAAR English I, English II, and Algebra I EOC exams taken by middle and high school students.

Figure 5.2 displays the percentage of students achieving the Approaches Grade Level standard on the STAAR-RLA/ELA exams for COE-authorized charter school campuses and matched traditional public school campuses. For the STAAR-RLA exams administered to Grades 3–8, 77% of students achieved the Approaches Grade Level standard at COE-authorized charter school campuses, compared with 73% of students at matched traditional public school campuses. At COE-authorized charter school campuses, lower percentages of students taking the STAAR English I EOC exam (75% vs. 80%) and the STAAR English II EOC exam (76% vs. 78%) achieved the Approaches Grade Level standard than students at matched traditional public school campuses.

Note. A total of 42 commissioner of education (COE)-authorized charter school campuses and 871 matched traditional public school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis. A total of 17 COE-authorized charter school campuses and 156 matched traditional public school campuses were included in the STAAR Algebra I end-of-course (EOC) analysis.

Section 6: Discussion of Findings

Overview

The number of operating charter schools nationally increased from about 3,700 to approximately 8,000 between the academic years 2005–06 and 2021–22. Student enrollment in charter schools also experienced substantial growth during that period, rising from about 1 million students in 2005–06 to nearly 3.7 million students in 2021–22. For the first time since charter schools began, however, the total number of charter school students recently decreased from 3,695,769 in 2020–21 to 3,682,526 in 2021–22 (White, 2023). In Texas, 1,034 charter school campuses enrolled 470,470 students in the 2022–23 academic year. Approximately 82% of charter school campuses operating in Texas that year (845) were classified as SBOE-authorized charter school campuses; approximately 12% (129) were ISD-authorized charter school campuses; and about 6% (60) were COE-authorized charter school campuses.

Summary of Results

The analyses included in this report compare the overall campus-level performance metrics across three classifications of charter school campuses with their matched traditional public school campuses. The matching techniques employed in these analyses ensured the selection of traditional public school campuses with similar student enrollment characteristics to examine and compare the descriptive statistics across different measures of campus performance. Appendix A includes a detailed description of the matching process.

The overall campus-level performance results were examined across several outcomes: attrition rates; STAAR exams; four-year longitudinal graduation rates for schools evaluated under AEA and standard accountability provisions; and CCMR outcomes for ISD- and SBOE-authorized charter school campuses.

Attrition

COE-authorized, ISD-authorized, and SBOE-authorized charter school campuses had higher attrition rates than their matched traditional public school campuses. COE-authorized charter school campuses had a 32% attrition rate, compared with 24% at matched traditional public school campuses. SBOE-authorized charter school campuses had an attrition rate of 24%, compared with 21% at matched traditional public school campuses. And ISD-authorized charter school campuses had a 24% attrition rate, compared with 20% at matched traditional public school campuses.

STAAR Results

At SBOE-authorized charter school campuses, 69% of students taking the STAAR-Mathematics exams and 80% of students taking the STAAR Algebra I EOC exam met the Approaches Grade Level standard, compared with 71% and 84%, respectively, at matched traditional public school campuses. Lower percentages of students achieved the Masters Grade Level standard on STAAR-Mathematics exams (15% vs. 17%) and the STAAR Algebra I EOC exam (20% vs. 29%) at SBOE-authorized charter school campuses compared with matched traditional public school campuses. For the STAAR-RLA exams, a higher percentage of students in Grades 3–8 at SBOE-authorized charter school campuses achieved the Approaches Grade Level standard (79% vs. 75%) than students at matched traditional public school campuses, and the same percentage of students achieved the Approaches Grade Level standard on the STAAR English I EOC exam (73%) and STAAR English II EOC exam (74%) as students at matched traditional public school campuses. A higher percentage of students at SBOE-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-RLA exams (23% vs. 22%) and lower percentages achieved the Masters Grade Level standard on the STAAR English I EOC exam (13% vs. 16%) and STAAR English II EOC exam (8% vs. 10%) compared with matched traditional public school campuses.

At ISD-authorized charter school campuses, 63% of students achieved the Approaches Grade Level standard on STAAR-Mathematics exams, compared with 68% of students at matched traditional public

school campuses, and 80% of students achieved the Approaches Grade Level standard on the STAAR Algebra I EOC exam, compared with 74% at matched traditional public school campuses. A lower percentage of students at ISD-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-Mathematics exams (12% vs. 13%) and a higher percentage achieved the Masters Grade Level standard on the STAAR Algebra I EOC exam (19% vs. 16%) than matched traditional public school campuses. For STAAR-RLA exams, 71% of students achieved the Approaches Grade Level standard at ISD-authorized charter school campuses, compared with 73% of students at matched traditional public school campuses. For the STAAR English I EOC exam, 76% of students at ISD-authorized charter school campuses and 67% of students at matched traditional public school campuses achieved the Approaches Grade Level standard. And for the STAAR English II EOC exam, 78% of students at ISD-authorized charter school campuses and 70% of students at matched traditional public school campuses received the Approaches Grade Level standard. Higher percentages of students at ISD-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-RLA exams (19% vs. 18%), the STAAR English I EOC exam (13% vs. 10%), and the STAAR English II EOC exam (9% vs. 6%) than students at matched traditional public school campuses.

At COE-authorized charter school campuses, lower percentages of students achieved the Approaches Grade Level standard on STAAR-Mathematics exams (66% vs. 69%) and the STAAR Algebra I EOC exam (77% vs. 84%) than students at matched traditional public school campuses. Lower percentages of students at COE-authorized charter school campuses achieved the Masters Grade Level standard on STAAR-Mathematics exams (13% vs. 16%) and the STAAR Algebra I EOC exam (17% vs. 27%) than students at matched traditional public school campuses. For the STAAR-RLA exams, a higher percentage of students at COE-authorized charter school campuses achieved the Approaches Grade Level standard (77% vs. 73%) and lower percentages achieved the Approaches Grade Level standard on the STAAR English I EOC exam (75% vs. 80%) and STAAR English II EOC exam (76% vs. 78%) than students at matched traditional public school campuses. A higher percentage of students at COE-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR-RLA exams (22% vs. 19%), and lower percentages of students at COE-authorized charter school campuses achieved the Masters Grade Level standard on the STAAR English I EOC exam (13% vs. 18%) and STAAR English II EOC exam (10% vs. 11%) than students at matched traditional public school campuses.

Grade 9 Four-Year Longitudinal Graduation Rates for the Class of 2022

SBOE-authorized charter school campuses evaluated under standard accountability provisions had a four-year longitudinal graduation rate of 96%, compared with 93% at matched traditional public school campuses. The four-year longitudinal graduation rate at ISD-authorized charter school campuses evaluated under standard accountability provisions was 91%, compared with 90% at matched traditional public school campuses. Additionally, four-year longitudinal graduation rates for campuses evaluated under AEA provisions were examined; the graduation rate at SBOE-authorized charter school campuses was 78%, compared with 100% at their matched traditional public school campuses. For ISD-authorized charter school campuses evaluated under AEA provisions, the graduation rate was masked due to the limited number of schools (one) operating under these provisions and was thus ineligible for this analysis; the rate for matched traditional public school campuses was 100%.

College, Career, and Military Readiness Outcomes

SBOE-authorized charter school campuses reported higher percentages of graduates on three CCMR outcomes compared with their matched traditional public school campuses: 46% of graduates met TSI college readiness benchmarks in both RLA and mathematics, compared with 42% from matched traditional public school campuses; 29% of graduates met the criterion score on an AP or IB exam in any subject, compared with 18% from matched traditional public school campuses; and 6% of special education students graduated under an advanced diploma plan, compared with 4% from matched traditional public school campuses. For all other CCMR outcomes, matched traditional public school campuses reported higher percentages of CCMR graduates.

ISD-authorized charter school campuses reported the same or higher percentages of graduates for all

except one CCMR outcome when compared with their matched traditional public school campuses. A lower percentage of graduates from ISD-authorized charter school campuses completed IEP and workforce readiness (1% vs. 2%) than matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public school campuses reported equal percentages of graduates meeting the criterion score on an AP or IB exam in any subject area (18%) and earning a Level I or Level II certificate in any workforce education area (1%). For all other CCMR outcomes, ISD-authorized charter school campuses reported higher percentages than matched traditional public school campuses.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for public comparison of school types. While a combination of sampling techniques was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small number of campuses in each category.

Because of the differences in STAAR performance standards, changes to the Texas Accountability Rating System, the award of new charter schools, the closure of low-performing charter schools, and the expansion of existing charters over the years, comparison of results should be made with caution. As a final note of caution, although the passage of SB 2 in 2013 resulted in the policy process change in charter school authorization, the reader is cautioned against attributing differences presented in this report solely to this change. Rather, differences may be attributable to other changes occurring over time, such as differences in the charter school applicant makeup, other process changes, and/or changes in leadership—none of which could be accounted for within the scope of this report.

Appendix A: Detailed Methods Description

This appendix provides a detailed description of the different methodological approaches employed to fulfill the statutory requirements of this annual report. Under Texas Education Code (TEC) § 12.1013 (b) (2024), the *Texas Charter Authorizer Accountability Report* must provide an opportunity for the public to compare the performance of State Board of Education (SBOE)-authorized, Independent School District (ISD)-authorized, and commissioner of education (COE)-authorized charter school campuses with the performance of matched traditional public school campuses. Specific performance metrics codified under TEC § 39.053(c) (2022) and attrition rates are required to be included in the report, disaggregated by grade level served. Notably, state accountability ratings are not included in this year's report. At the time of the report's creation, the issuance and publication of 2023 A through F ratings under the final 2023 rule was pending and subject to change based on judicial rulings or decisions from the 88th Legislature during a special session.

Purposive Sampling

The purpose of creating a matched set of traditional public school campuses for comparison is to optimize the covariate balance between the two comparison groups. In the education literature, several observed characteristics are well documented to influence school outcomes (Aitkin & Longford, 1986; Hill & Rowe, 1996; McCaffrey et al., 2004). In order for this study to create matched groups for comparison, the covariate balance between groups is of utmost importance (Greevy et al., 2004; Raudenbush & Willms, 1995). The procedure used to create a matched sample of traditional public school campuses for comparison to charter school campuses is described in detail below.

The expansive research conducted in the field of education and the comparative nature of this study allow for the use of purposive sampling to select the matched set of traditional public school campuses. In purposive sampling, the researcher uses education literature to guide the selection of covariates of the population important to the study (Bryman, 2016). Specifically in the examination of school outcomes, literature has documented several important covariates for consideration: geographic location (Wong et al., 2013), school size (Fowler & Walberg, 1991), grade levels served (Fowler & Walberg, 1991; Heck, 2000), teacher experience (Clotfelter et al., 2007), concentrations of economically disadvantaged students (Fowler & Walberg, 1991; Heck, 2000), special education students served (Heck, 2000; McCaffrey et al., 2004), historically marginalized student group enrollment (Darling-Hammond, 2004), and the proportion of English learners served (Abedi & Gándara, 2006). Guided by this vast array of literature, this study creates a systematic sample (Bryman, 2016) of matched traditional public school campuses by optimizing important covariate balances between the charter and traditional public school groups. The selection of the systematic sample begins with defining the sampling frame.

Sampling Frame

The sampling frame is the subset of the population from which the sample, or in this case, the matched set, is drawn (Bryman, 2016). The sampling frame is defined as the population of traditional public school campuses located within cities with at least one charter school campus. By defining the sampling frame in this way, the study controls for exogenous characteristic influence (Wong et al., 2013) on outcome variables. Texas has public schools in 1,088 cities.³¹ Of those, 904 cities have only traditional public school campuses, 169 have both traditional public school and charter school campuses, and 15 have only charter school campuses. When the total population of 8,010 traditional public school campuses was narrowed to include only those located in cities with charter school campuses, 4,918 traditional public school campuses remained as the sampling frame.

Stratification

Once the sampling frame was defined, the frame was stratified into three distinct groups (strata) by grade

³¹ The city in which each school is located was reported as the ARC city variable in the [Texas school finder](#) ArcGIS data downloaded March 12, 2024.

levels served. The school level (elementary, middle, or high school) was assigned to each school based upon the proportion of students served in each grade. Within each of the three strata, the sampling process was conducted independently to ensure robust matching and to ensure the matched set of traditional public school campuses was representative of the school level.

All schools were categorized as primarily elementary school (kindergarten through Grade 5), middle school (Grades 6–8), or high school (Grades 9–12) based on the largest percentage of students served. To calculate the percentage of students served in each grade-level group, grade-level counts for elementary, middle, and high schools were summed and divided by total enrollment. Schools were labeled as an elementary, middle, or high school based upon the highest percentage. Schools with equal proportions of students in two grade-level groups were labeled with the higher grade-level category. For example, if a school served equal percentages of elementary and middle school students, the school was labeled as a middle school; if a school served equal percentages of middle and high school students, the school was labeled as a high school.

Independent Sampling

Because this report compares the performance of charter school campuses by authorizer type, matched sets of traditional public school campuses for SBOE-authorized, ISD-authorized, and COE-authorized charter school campuses were created independently. The sampling techniques described below were conducted three times—once for each of the three authorizer types. The sampling occurred with replacement, meaning that the same sampling frame within each stratum was used for each of the charter school authorizer groups. Sampling each independently ensured that the matched set of traditional public schools was representative of the charter schools by authorizer type.

Covariate Balancing

Beginning with the sampling frame for each school-level stratum, covariates not controlled for in the stratification or independent sampling were balanced first using t-tests to determine significant difference (covariates are displayed below). If the t-test revealed no significant difference in the distributions of the variable among charter schools and traditional public schools, the variable was considered balanced. If the t-test yielded a significant difference, outliers in the traditional public school data were trimmed (Ghosh & Vogt, 2012). An outlier was trimmed from the data if the standard deviation from the mean exceeded the standard deviation of the fifth and 95th percentile means. After data were trimmed, t-tests were conducted to evaluate differences between the two groups. The specific order of the covariate balancing was selected based upon the degree of difference in group means. The covariates with the largest differences were trimmed first. T-tests were conducted again, and the process was repeated. In total, eight distinct covariates were balanced:

- Total number of students enrolled
- Average teacher years of experience
- Percentage of African American students enrolled
- Percentage of Hispanic students enrolled
- Percentage of enrolled students receiving special education services
- Percentage of emergent bilingual students/English learners enrolled
- Percentage of enrolled students identified as economically disadvantaged
- Percentage of enrolled students at risk of dropping out of school³²

Appendix D details the performance results for each charter school included in the report. Residential treatment facilities (RTFs), juvenile justice alternative education programs (JJAEPs), and disciplinary alternative education programs (DAEPs) were not included in purposive sampling, nor in performance analyses. RTFs were excluded because the unique student populations served in instructional settings are far different from other schools. JJAEPs and DAEPs were excluded because the performance of their student populations is attributed back to the students' home campuses. The charter school campuses listed

³² All covariates are from the Texas Academic Performance Report, Texas Education Agency, 2022–23.

in Appendix D are those reported in the academic performance metrics in this report.

Outcome Measure Calculation

For attrition rates, State of Texas Assessment of Academic Readiness (STAAR®) performance rates, graduation rates, and college, career, and military readiness (CCMR) indicator rates, results were calculated using the number of students at each campus in the group that contributed to the outcome measure. Rather than averaging the campus-level rates for all campuses in a group for each metric, numerators and denominators for each metric were summed then divided to provide an overall rate for the group. This prevents results from being significantly influenced by extreme performance results for very small campuses.

While aggregate outcomes are reported by grade level (elementary, middle, and high schools separately), attrition rates, graduation rates, CCMR indicator rates, and STAAR rates are calculated only including campuses with each grade-level designation. Despite the grade-level categorization, the outcome data for all students are included in the per-grade-level displays.

All schools were categorized as primarily elementary school (kindergarten through Grade 5), middle school (Grades 6–8), or high school (Grades 9–12) based on the largest percentage of students served. Grade-level enrollment for each school type was summed and divided by the total enrollment. Schools were then categorized as elementary, middle, or high schools depending on the category with the highest percentage. Schools with equal proportions of students in two categories were labeled with the highest option: (mid=high, labeled high; elem=mid, labeled mid; elem=high, labeled high). The higher school grade level categorization was selected as it allows more options for the schools' data to be included in the report.

Because grade-level assignments were made using the highest proportion of students served, when outcomes are reported for a specific school grade-level categorization, they may contain other grade-level students. For example, a school that serves students from kindergarten through eighth grades with 85% of students in kindergarten through Grade 5 and 15% of students in Grades 6–8 would be categorized as an elementary school. However, when the STAAR-Reading Language Arts exam performance data are displayed for elementary schools, the aggregate reported numbers will contain the students from Grades 6–8 for this school.

Attrition Analysis

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2022 who did not return to the same campus in the fall of 2023. This calculation is adjusted to account for the grade levels available to students at each campus as well as additional factors. For instance, students were excluded from the calculation if the campus in which they were enrolled in 2022–23 did not offer the next grade they were expected to move into in 2023–24 or if they were at a campus in 2022–23 that was no longer active in 2023–24. Students who were retained in a grade, including those in Grade 12 in the same campus, remained in the calculation. Some campuses may not receive an attrition rate because all of their students are excluded from the attrition denominator due to their subsequent grade level not being offered at that campus in 2023–24. The 2022–23 annual attrition rates for this report, along with the numerators and denominators, were provided by the Texas Education Agency (TEA) for all active campuses for the 2022–23 school year. RTF, JJAEP, and DAEP campuses were excluded from the aggregate calculations. Notably, some campuses physically closed prior to the beginning of the 2022–23 school year though the campus status was not changed to “closed.” For these campuses, a 100% attrition rate was reported in Appendix D of this report, and the schools were noted as active-zero-enrollment campuses. Though they are reported in Appendix D, active-zero-enrollment campus attrition rates were not included in the aggregate analysis in Sections 3, 4, and 5 in the report.

Graduation Rate

The graduation rate reported is the class of 2022 longitudinal four-year graduation rate calculated for state accountability purposes, which follows a cohort of first-time students in Grade 9 through the fall

after their expected graduation date (TEA, 2023b).³³ For schools rated under standard accountability provisions, the graduation rate numerator and denominator were downloaded from the 2022–23 Texas Academic Performance Report. The graduation rate calculation is the total number of graduates divided by the sum of the number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the cohort. Per the *Secondary School Completion and Dropouts in Texas Public Schools 2021–22* report, “For campuses to which alternative education accountability (AEA) procedures applied, a new completion measure was introduced in 2023 as part of the state accountability system refresh for the 2023 accountability cycle. The new completion measure, which calculates a rate for students who graduate, continue in high school, or earn a Texas Certificate of High School Equivalency, includes students who previously dropped out of school (and are not eligible for any other exclusion) in the numerator, but not in the denominator” (TEA, 2023b p.140).

Students are excluded from this graduation rate for state accountability purposes for a multitude of reasons, all specified in state statute:

- **Students are excluded** if they meet one of the following criteria listed under TEC §39.053(g-1) (2022): a) ordered by a court to attend a high school equivalency certificate program but has not yet earned a high school equivalency certificate; b) previously reported to the state as a dropout except in completion measure calculations for alternative education campuses; c) in attendance but not in average daily attendance membership; d) enrolled initially in Grades 7–12 as an unschooled refugee or asylee as defined by TEC § 39.027(a-1) (2022); e) is in the district exclusively as a function of having been detained at a county detention facility but is otherwise not a student of the district, or is being provided services by an open-enrollment charter school exclusively as the result of having been detained at the facility; f) is incarcerated in a state jail or federal penitentiary as an adult or as a person certified to stand trial as an adult; or g) has suffered a condition, injury, or illness that requires substantial medical care and leaves the student unable to attend school and assigned to a medical or residential treatment facility.
- **Students can also be excluded** per TEC § 39.053(g-2) (2022) if they a) are at least 18 years of age as of September 1 and have met the credit requirements for high school graduation; b) have not fulfilled the requirements of their individualized education program; and c) are enrolled and receiving individual education program services.
- **Students failing to enroll in school** after leaving an RTF or pre- or post-adjudication facility are excluded from the calculation for the district serving the facility under TEC § 39.053(g-3) (2022).
- **Students are also excluded** per TEC § 39.053(g-4) (2022) if they a) are at least 18 years of age and under 26 years of age; b) have not been previously reported as a dropout; and c) have not been enrolled in school during the previous nine months before enrolling in a high school equivalency program, a dropout recovery school, or an adult education program provided under a high school diploma and industry certification charter school program except in completion measure calculations for alternative education campuses.
- **TEC § 39.055 (2022) permits students** in a Texas juvenile justice department facility or residential facility served by a Texas public school district to be excluded.

College, Career, and Military Readiness Outcomes

Under TEC § 39.053 (2022), graduates have several ways to demonstrate CCMR. For this report, 2022 annual graduates (students who graduate from a campus in a school year regardless of cohort, which is separate from, and may include different students than, the longitudinal graduation cohorts) demonstrate

³³ See the [Secondary School Completion and Dropouts in Texas Public Schools 2021–22 report](#) for more about the calculation of the class of 2022 longitudinal graduation rate.

college, career, or military readiness in any one of the following ways:^{34, 35, 36}

- **Meet Texas Success Initiative (TSI) Criteria in Reading Language Arts (RLA) and Mathematics.** This is done specifically by meeting the college-ready criteria in both RLA and mathematics on the TSIA1 and/or TSIA2 assessment, SAT, or ACT or by successfully completing and earning credit for a college prep course in both English language arts (ELA) and mathematics as defined in TEC § 28.014 (2022) and TEC §51.338 (2022). The criteria for successful completion of a college prep course should be in alignment between a local education agency and the partnering institution of higher education. In accordance with TEC §51.338(e) (2022), upon successful completion of a college prep course, students earn a TSI exemption from the partnering IHE(s) in that content area. Students should only be reported as successfully completing a course if they have met TSI exemption requirements. The assessment results considered include TSIA1 and/or TSIA2 assessments through October 2022, SAT and ACT results through the July 2022 administration, and course completion data via Texas Student Data System PEIMS.³⁷ A graduate must meet the TSI requirement for both RLA and mathematics but does not necessarily need to meet them on the same assessment. For example, a graduate may meet the TSI criteria for college readiness in RLA on the SAT and complete and earn credit for a college prep course in mathematics.
- **Meet Criteria on Advanced Placement (AP) or International Baccalaureate (IB) Examination.** A graduate can accomplish this by meeting the criterion score on an AP or IB examination in any subject area. The criterion score is 3 or higher for AP and 4 or higher for IB.
- **Earn Dual Course Credits.** To achieve this, a graduate must complete and earn at least three credit hours in RLA or mathematics or at least nine credit hours in any subject. See Appendix H of the *2023 Accountability Manual* (TEA, 2023a) for additional information.
- **Earn an Industry-Based Certification.** To achieve this, a graduate must earn an industry-based certification under Title 19 of the Texas Administrative Code § 74.1003 (2022), amended to be effective January 9, 2022, prior to graduation from high school.³⁸
- **Earn a Level I or Level II Certificate.** To achieve this, graduates are awarded Level I or Level II certificates in any workforce education area.³⁹
- **Complete and Earn Credit for an ELA College Prep Course.** To achieve this, a graduate must earn credit for an ELA college preparatory course defined in TEC § 28.014 and TEC §51.338 (2022).
- **Complete and Earn Credit for a Mathematics College Prep Course.** To achieve this, a graduate must earn credit for a mathematics college preparatory course defined in TEC § 28.014 and TEC §51.338 (2022).
- **Complete an OnRamps Dual Enrollment Course.** To achieve this, a graduate must complete an OnRamps dual enrollment course and qualify for at least three hours of university or college credit in any subject area.
- **Earn an Associate Degree.** This means a graduate has earned an associate degree by August 31 immediately following their high school graduation.
- **Graduate with Completed Individualized Education Program (IEP) and Workforce Readiness.** To achieve this, a graduate must receive a graduation type code of 04, 05, 54, or 55, which indicates the student has completed his/her IEP and has either demonstrated self-employment with self-help skills to maintain employment or has demonstrated mastery of specific employability and self-help skills that do not require public school services.
- **Graduate Under an Advanced Diploma Plan and Identified as a Current Special Education**

34 For more information, see Appendix H of the [TEA 2023 Accountability Manual](#).

35 See the [2022–23 Texas Academic Performance Report Glossary](#) for more information on the CCMR postsecondary readiness indicators.

36 Per the [TEA 2023 Accountability Manual](#) (page 10; PDF e-page 14): The military enlistment indicator is scheduled to return for 2024 accountability standards based on a new data collection as explained in the [September 8, 2022, "To The Administrator Addressed" correspondence](#).

37 See Appendix H of the [TEA 2023 Accountability Manual](#) for more information.

38 See Appendix J of the [TEA 2023 Accountability Manual](#) for more information about industry-based certificates.

39 See Appendix D or H of the [TEA 2023 Accountability Manual](#) for more information about Level I and Level II certificates.

Student. To achieve this, a student identified as receiving special education services during the year of graduation graduates under a graduation plan type identified as a Recommended High School Plan (RHSP), Distinguished Achievement Plan (DAP), Foundation High School Plan with an Endorsement (FHSP-E), or Foundation High School Plan with a Distinguished Level of Achievement (FHSP-DLA).

Appendix B: Description of Charter School Campuses Evaluated Under Alternative Education Accountability Provisions

TABLE B.1

Texas Public School Campuses Evaluated Under Alternative Education Accountability Provisions, by School Type, 2022–23

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter, Not Residential Treatment Facilities	0	5	106	111
ISD-Authorized Charter	0	0	2	2
COE-Authorized Charter, Not Residential Treatment Facilities	0	0	4	4
SBOE-Authorized Charter, Residential Treatment Facilities	0	3	35	38
COE-Authorized Charter, Residential Treatment Facilities	0	0	2	2
Total Alternative Education Accountability Charter School Campuses	0	8	149	157
Traditional Public School Campuses	0	5	162	167
DAEP Campuses	0	0	0	0
JJAEP Campuses	0	0	0	0
Residential Treatment Facilities	0	1	56	57
Total Alternative Education Accountability Traditional Public School Campuses	0	6	218	224
Total Alternative Education Accountability Texas Public Schools	0	14	367	381

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Note. There are no ISD-authorized charter school campus residential treatment facilities.

TABLE B.2

Student Enrollment in Texas Public School Campuses Evaluated Under Alternative Education Accountability Provisions, by School Type, 2022–23

Campus Type	Elementary School *	Middle School	High School	Total
SBOE-Authorized Charter, Not Residential Treatment Facilities	0	665	18,808	19,473
ISD-Authorized Charter	0	0	312	312
COE-Authorized Charter, Not Residential Treatment Facilities	0	0	871	871

Percent of Students Who Achieved the Masters Grade Level Standard on the STAAR U.S. History End-of-Course Exam by Charter Authorizer Type and Matched Traditional Public School Campuses, 2022–23

Source. Texas Academic Performance Reports, Texas Education Agency, 2022–23.

Note. A total of 303 State Board of Education (SBOE)-authorized charter school campuses and 31 Independent School District (ISD)-authorized charter school campuses were included in the State of Texas Assessments of Academic Readiness (STAAR®) U.S. History end-of-course exam analysis, with 224 traditional public school campuses matched to SBOE-authorized charter school campuses and 397 traditional public school campuses matched to ISD-authorized charter school campuses.

Appendix D: Charter School Campus-Level Performance Results

Appendix D includes individual charter school campus outcome measures presented in the report. Detailed information regarding outcome measures and charter school authorizer categorization can be found in Section 1, and Appendix A details report methodology. Matched traditional public school campus outcome measures can be found in Appendix E (web only). Because matched comparison sets are intended for comparisons made in the aggregate, readers are cautioned from making direct campus-to-campus comparisons between the individual charter schools in the analysis and any single campus in the matched comparison set (Appendix E).
