

## Road Construction

1. We know that the questions that the teacher asks the children while they work can lead to greater learning opportunities, what other questions might the teacher of asked the children while they were working? What did you think of the teachers questioning strategies? Can you plan ahead for this? How?
2. Should an activity like this be assessed? If yes; what kinds of assessment might the teacher use in this kind of center activity?
3. When planning a center such as this what are some considerations we need to make for special needs students?
4. When planning a center such as this what do you need to consider in your planning for materials and supplies, physical environment, organization, student behavior, and monitoring the space while away from it.
