

University of Houston Faculty Senate Executive Committee Resolution
(Passed unanimously by the Executive Committee on March 5, 2007)

The Executive Committee recommends to the Senate that University of Houston faculty parking rates increase no more in any given year than the average percentage provided for faculty merit salary increases in that year.

Rationale: The cost of employment at the University continues to be negatively affected by factors beyond local control, such as the increasing cost of medical insurance. Parking costs are totally within the control of the University.
