RESOLUTION ON UH SYSTEM RESHAPING (Revised 10/21/92)

A key factor affecting the productivity of the University of Houston is student and faculty morale. This morale suffers when system wide allocation of resources is not perceived to be equitable.

Many faculty believe that the University of Houston System has largely exempted itself from the financial discipline it has imposed on the other components. We salute the Chancellor for taking immediate and concrete steps to address this perception and the resultant problem of morale at UH by pledging to the Board of Regents at their October 21, 1992 meeting that the UH System will undergo a continual reshaping effort.
