II. BACKGROUND

Narrative assessment is an important aspect of the measurement of the cognitive and non-cognitive performance of medical students. It can be incorporated into either formative or summative evaluations and is valuable as a source of data for student feedback.

 - 2. Longitudinal Primary Care course
 - 3. All required clerkships
- C. The narrative assessment should:
 - 1. Feedback that is consistent and uniform across students
 - 2. Based on domains appropriate to the course and longitudinal interaction, such as collaboration, interpersonal skills, oral and written communication skills, professionalism, and contribution to sessions.
 - 3. Be linked to the TJFFCOM’s Competencies and Educational Program Objectives.
 - 4. Address both the student’s strengths and opportunities for improvement, citing examples whenever possible.

IV. MONITORING OF THIS POLICY

- A. Course and Clerkship Directors are responsible for obtaining narrative assessments as agreed-upon by the Clerkship Subcommittee, Curriculum Committee, and Office of Student Affairs.
