Physics 1301 Introductory General Physics I

Catalog Description: First semester of a two-part non-calculus-based course covering mechanics of one- and two-dimensional motion, dynamics, energy, momentum, rotational dynamics and kinematics, statics, gravity, oscillations, waves and fluids. Primarily for majors other than physics and engineering. Credit may not be applied toward a degree for both Phys 1301 and University Physics I, Phys 1321.

Prerequisites: Math 1330

Course Structure:

Computer and internet access are required for this course.

For the current list of minimum technology requirements and resources, see http://www.uh.edu/online/tech/requirements. For additional information, contact the office of Online & Special Programs at UHOnline@uh.edu or 713-743-3327.

Blackboard, Mastering Physics, Microsoft Teams and possibly other online resources will be required for this course. Students may also be required to send scans of paper documents (i.e. using a smart phone with camera or scanner). See https://uh.edu/online/students/remote-learning/ for more information on remote learning tools.

Mastering Physics access may be purchased as part of a textbook package at the UH bookstore, or standalone access can be purchased directly from the publisher’s website at https://mlm.pearson.com/northamerica/.

Mastering Physics course ID, Teams connection information, and other relevant information specific to your course here.

Textbook:

- Physics, Fifth Edition, James S. Walker. If you purchase the textbook from the UH bookstore, it will include an access code for Mastering Physics.
- A suitable alternative to the Walker textbook is available for free at: https://openstax.org/details/books/college-physics
Course Requirements:

A. **(OPTIONAL) Warm up Assignments:** Reading quizzes covering the material from the reading assignment, consisting of 2-3 questions/problems, will be assigned online. The quizzes will be available at least 24 hours before they are due, and they will be due by the beginning of the lecture time. There will be a time limit for taking the quiz and you will be allowed 2 attempts for each quiz. Solutions for the quizzes will be discussed during the lecture and will be posted on the class website.

B. **Homework Assignments:** Homework will be completed online using Mastering Physics. Ten or more homework problems will be assigned at the beginning of each chapter and will be due approximately one week from that date.

C. **Diagnostic Exam:** The required diagnostic exam for this course will test your basic mathematical skills in algebra, geometry, trigonometry and word problem solving. The exam consists of 20 multiple choice questions. The exam will be administered online by the CASA Testing Center January 19-29. You can log onto the CASA website [http://casa.uh.edu](http://casa.uh.edu) to register for the test.

The diagnostic exam is worth 3% of your final grade for the course. If you score above 70%, you should be well prepared to pass the course; 51 - 70%, you should review algebra, trigonometry and pre-calculus; 50% and below, you should consider dropping the course or re-enrolling once you have improved your math and problem solving skills.

D. **My Readiness Test Math Tutorial:** If you wish to improve your math skills, you can complete an online math tutorial through My Readiness Test. If you purchased the Walker textbook from the UH Bookstore, you will receive a free access code to My Readiness Test. If you did not purchase your textbook through the UH bookstore, you can purchase a code for My Readiness Test for $15 during the registration process. See [https://uh.edu/nsnm/physics/undergraduate/intro-course-info/](https://uh.edu/nsnm/physics/undergraduate/intro-course-info/) for information on how to register and access the math tutorial through My Readiness Test.

E. **Exams:** Exams will be given online. There will be three regular exams. Regular exams will cover 3-5 chapters each. There will also be a longer final exam which will be comprehensive, covering all the material in the course. The exams will be administered by CASA at [http://casa.uh.edu/](http://casa.uh.edu/). The exams will use software which will monitor your activities while taking the exam. Exams will be offered for 1 or 2 days, which may include weekends. You must sign up for an exam time in advance. You must have a CASA account. If you don’t already have one, go to [http://casa.uh.edu/](http://casa.uh.edu/), click “I don’t have an account,” fill in the information and submit the form. Please do this well in advance of your first exam. You may be required to turn in your work for each exam (via scanning or photographing it).

F. **Teamwork Component:** A teamwork component will be evaluated in this course. This is required component of the course. Choose one of these examples or use some other form of teamwork.

   a. Concept tests will be administered during lecture. Students will discuss these questions in teams as a method of peer instruction. (For this to count as teamwork, students would have to work in groups using the “breakout room” features in Teams or Zoom.)

   b. Teams consisting will be assigned to create a study guide for each of the exams for the course. The study guides will be posted in Blackboard and students will be able to choose the study guide which is best for use to prepare for the exam. Each group will have to work together to determine what will be included on the study guide and the best format for presenting it to the students.
c. Other?

G. **Student Success Program/Recitation Sessions**: This course will include recitation study groups. Recitation sessions are held for one hour each week and begin the third week of classes. These sessions provide the opportunity to participate in problem-solving activities designed to enhance your understanding and mastery of the course content. All students are invited to attend. However, **any student scoring below 70% on the Diagnostic Exam MUST attend one recitation each week** for the remainder of the semester. For these students, recitations will count for 50% of the Teamwork/Attendance component grade. Recitation attendance will be graded as the percentage of required recitation sessions attended. Students must arrive on time, stay for the entire session, and record their attendance.

**Grading:**

- 3% Diagnostic Exam
- 10% Teamwork / Attendance
- 7% Discretionary – Could count for reading quizzes, more towards exams, etc. However, this percentage cannot be put towards Homework
- 10% Homework
- 17% Regular Exam I
- 17% Regular Exam II
- 17% Regular Exam III
- 19% Final Exam

**Academic Honesty**: It is each student’s responsibility to read and understand the Academic Honesty Policy found at [http://catalog.uh.edu/content.php?catoid=36&navoid=13063](http://catalog.uh.edu/content.php?catoid=36&navoid=13063).

The following rules apply to all exams for this class:

- Do not communicate about the exam with anyone (other than your instructor or CASA staff) from the time that the first student takes the exam until 48 hours after the last student takes the exam.
- Do not post information about the exam at any time (while you are taking it or afterward) on a website or any other forum where other people can find the information.
- Do not make or save a record of the exam questions. This includes screenshots, pictures, video, copying and pasting the text, etc.
- Do not use any electronic devices while taking the exam other than the computer you are using to take the exam and your calculator.
- While you are taking the exam, you may not have any other applications open on your computer.
- Do not consult any outside resources such as books, notes, or websites while taking the exam.

Academic Honesty proceedings may be initiated against any student who violates these rules.

**Course Objectives:**

The objective of this course is to learn the principles of mechanics through application of Newton’s laws, understand the concept of energy and be able to apply these concepts to describe the motion of objects.
Upon completion of this course, students will be able to:

1. comprehend the fundamental principles in mechanics.
2. use the formalisms of the theory and mathematical techniques to solve problems. This involves application, analysis, and synthesis of the fundamental principles.

Other learning outcomes include:

1. Students completing this course will be able to convey knowledge of the basics principles of physics and be able to use these principles to solve elementary problems.
2. Students will be able to take a real-life problem and use physical principles and basic mathematical tools to describe the problem.
3. Student will have the ability to communicate orally and in writing in a clear concise manner the concepts of Physics.

Course Content:

This course will cover Chapters 1-15 which include the following topical areas:

1. Vector in Physics
2. Newtonian Mechanics: Motion in 1-D and 2-D
3. Work and Energy
4. Momentum and Collisions
5. Rotational Kinematics, Dynamics and Energy
6. Gravity
7. Oscillations about Equilibrium
8. Waves and Sound
9. Fluids

Tutoring and Additional Resources: See https://uh.edu/nsm/physics/undergraduate/intro-course-info/.

Policy on grades of I (Incomplete): The temporary grade of I (incomplete) is a conditional and temporary grade given when students (a) are currently passing a course or (b) still have a reasonable chance of passing in the judgment of the instructor, but for non-academic reasons beyond their control have not completed a relatively small part of all requirements. Incompletes will be given only when documentation has been submitted to support the need to receive an incomplete, i.e., medical statements.

Addendum: Whenever possible, and in accordance with 504/ADA guidelines, the University of Houston will attempt to provide reasonable academic accommodations to students who request and require them. Please call 713-743-5400 for more assistance.

Religious Holy Days: Students whose religious beliefs prohibit class attendance or the completion of specific assignments on designated dates may obtain an excused absence. To do so, please make a written request for an excused absence and submit it to your instructor as soon as possible, to allow the instructor to make arrangements. For more information, see: http://catalog.uh.edu/content.php?catoid=36&navoid=12931

Counseling and Psychological Services (CAPS) can help students who are having difficulties managing stress, adjusting to college, or feeling sad and hopeless. You can reach CAPS (www.uh.edu/caps) by calling 713-743-5454 during and after business hours for routine appointments or if you or someone you know is in crisis. Also, there is no appointment necessary for the “Let’s Talk” program, which is a drop-in consultation service at convenient locations and hours around campus. https://uh.edu/caps/outreach/lets-talk/.
**Excused Absence Policy:** Regular class attendance, participation, and engagement in coursework are important contributors to student success. Absences may be excused as provided in the University of Houston [Undergraduate Excused Absence Policy](#) and [Graduate Excused Absence Policy](#) for reasons including: medical illness of student or close relative, death of a close family member, legal or government proceeding that a student is obligated to attend, recognized professional and educational activities where the student is presenting, and University-sponsored activity or athletic competition. Additional policies address absences related to military service, religious holy days, pregnancy and related conditions, and disability.

**Standard Disclaimer:** This syllabus is subject to change at the discretion of the instructor.

**Recording of Class:** Students may not record all or part of class, livestream all or part of class, or make/distribute screen captures, without advanced written consent of the instructor. If you have or think you may have a disability such that you need to record class-related activities, please contact the [Center for Students with DisABILITIES](#). If you have an accommodation to record class-related activities, those recordings may not be shared with any other student, whether in this course or not, or with any other person or on any other platform. Classes may be recorded by the instructor. Students may use instructor’s recordings for their own studying and notetaking. Instructor’s recordings are not authorized to be shared with anyone without the prior written approval of the instructor. Failure to comply with requirements regarding recordings will result in a disciplinary referral to the Dean of Students Office and may result in disciplinary action.

**Syllabus Changes:** Due to the changing nature of the COVID-19 pandemic, please note that the instructor may need to make modifications to the course syllabus and may do so at any time. Notice of such changes will be announced as quickly as possible through email, Blackboard, and/or Teams.

**Required language for face-to-face courses:**

**Face Covering Policy:**
To reduce the spread of COVID-19, the University requires face coverings on campus including classrooms for both faculty and students. Face coverings must cover your mouth and nose and be worn throughout the class session. A mask with a valve is not considered an adequate face covering and should not be used, as it can expel exhaled air, increasing the risk to others. Eating or drinking during class is discouraged and is not an excuse for removing the face covering for any extended length of time. For additional information on the use of face coverings, please see [Face Covering FAQs](#). Failure to comply with the requirement to wear a face covering in class will result in your being asked to leave the classroom immediately and a disciplinary referral through the Dean of Students Office. Requests for accommodations relating to the face covering policy may be directed to the [Center for Students with DisABILITIES (CSD)](#).

**Required Daily Health Self-Assessment:**
Your presence in class each session means that you have completed a daily self-assessment of your health/exposure and you:

- Are NOT exhibiting any [Coronavirus Symptoms](#)
- Have NOT tested positive for COVID-19
- Have NOT knowingly been exposed to someone with COVID-19 or suspected/presumed COVID-19
If you are experiencing any COVID-19 symptoms that are not clearly related to a pre-existing medical condition, do not come to class. Please see COVID-19 Diagnosis/Symptoms Protocols for what to do if you experience symptoms and Potential Exposure to Coronavirus for what to do if you have potentially been exposed to COVID-19. Consult the (select: Undergraduate Excused Absence Policy or Graduate Excused Absence Policy) for information regarding excused absences due to medical reasons.
