

Statistical Internship working with Dr. Wenjiang Fu on Ophthalmologic Mass-spectrometry Data

One collaborative research project between Dr. Fu and UH Investigators in UH Chemistry and Ophthalmology needs statistical interns working on Mass-spectrometry data of tear specimen.

It has 22 subjects in three clinical groups with more than 2400 protein groups. Students with biology background and statistics / data science background are needed. This project will last 2-3 months and will start immediately. Co-authorship on publication is possible and depends on the findings.

Please contact Dr. Fu at fuw@math.uh.edu if you are interested.
