What? PeopleSoft Student Administration software will be implemented at UH and at UH-Victoria to handle all student-related information: schedules, courses, grades, records, transcripts, etc.

Why? Our sixteen-year-old legacy system (called ADMIN) has done an amazing job for us, but can't take us into the future to support the kinds of reporting and tracking we need to do.

Where? UH and UH-Victoria will implement the new software. UH-Clear Lake is already using the software and will upgrade to the same version UH and UHV will be using. All four UH System universities have used PeopleSoft HR and Finance since 2001.

When? Go-Live for the new software will be in Spring 2007, in time for registration and processing of students for Fall 2007. The old ADMIN system will be used for Spring and Summer 2007 registration, billing, grades, and all other records.

Who? Everyone who currently uses the ADMIN system will change over to PeopleSoft. Faculty, staff and students will have a new self-service interface accessible via the internet.

How? A dedicated Project Team has been working with staff, faculty, students, administrators, and consultants for more than a year to convert data and processes to PeopleSoft. The next step is extensive testing, begun in early Fall 2006 and continuing to Go-Live.

What does PeopleSoft look like?
