

Construction Management Technology

The initial review of accreditation requirements by the American Council on Construction Education (ACCE) during the 2006-07 academic cycle, coupled to the new 120-hour limit set by the state has prompted the faculty to make the following revisions to the program:

- A revised 4-year recommended course sequence totaling 120 hours has been developed.
- Name change from Construction Management Technology to Construction Management with attached Non-substantive degree plan change form.
- Change pre-requisites in the following courses:
 - CNST 1301
 - CNST 2341
 - CNST 3301
 - CNST 3331
 - CNST 4331
 - CNST 4372
- Change course content/level:
 - CNST 2361 CNST 1361
 - CNST 4305 CNST 3205
 - CNST 4311 CNST 3311
 - CNST 4312 CNST 3312
 - CNST 2365 CNST 4265
 - CNST 3402 CNST 4302
 - CNST 4381
 - CNST 3321 CNST 2321
 - CNST 4351 CNST 2351
 - CNST 4385 CNST 3185
- New courses:
 - CNST 3355 (lecture) and 3155 (lab) (replaces MECT3355/3155 due to content)
 - CNST 3351
 - CNST 4341
 - CNST 4190: 4290:4390

Non-substantive Program Name Change Request

Bachelor of Science
Construction Management

University of Houston Central Campus - College of Technology

I. Describe briefly the change request.

The request is to change the name of the **Construction Management Technology** major to **Construction Management**.

II. Provide a rationale for the proposed change.

The proposed name change from Construction Management Technology to **Construction Management** describes the current program contents, more accurately. In addition, the proposed name is more common to the construction industry and it fits more suitably with the 60 Baccalaureate of Science programs accredited by the American Council for Construction Education (ACCE). The word "Technology" in the degree title leads employers to expect our graduates are Laboratory Technicians and CAD Operators instead of Construction Managers. The name change will help the program grow by attracting additional students and employers.

III. Include the assessment of its effect on the administrative unit(s) involved or the institution as a whole.

The administrative unit is already in place for the current **Construction Management Technology** program and the name change will not require additional administrative resources.

IV. Summarize implications for classes, distribution of personnel, availability of facilities, and availability of equipment.

The name change will have no impact on classes, personnel, facilities, or equipment.

V. Give information regarding any additional costs or savings.

There should be no direct change in either costs or savings. However, the new degree name should appeal to more students and employers and therefore it will result in increase in students' enrolment and additional income to the college.

VI. Provide Library Staff's Assistance of Library Resources Necessary for the Proposal Program.

No additional library resources will be required. The M.D. Anderson Library currently maintains considerable holdings in the Construction Management area.

**UNIVERSITY OF HOUSTON CENTRAL CAMPUS
BACHELOR OF SCIENCE IN CONSTRUCTION MANAGEMENT
TECHNOLOGY**

Display how proposed program(s) would appear on the Coordinating Board program inventory.
Include Texas CIP code designations(s).

Bachelor of Science (major in Construction Management)
Relevant CIP – **15.1001.00 19**

How would name(s) of program(s) appear on student diplomas?
**Bachelor of Science
Construction Management**

How would name(s) of programs(s) appear on student transcripts?
**Bachelor of Science
Construction Management**

Administrative unit(s) responsible for the program(s);
**Engineering Technology Department in the College of Technology
University of Houston**

Proposed date for implementation of program: **Fall 2008**

Persons to be contacted for further information about proposed program(s)

Enrique Barbieri, Chair, Engineering Technology Department
Phone: 713 743-4073, e-mail ebarbieri@central.uh.edu

Construction Management (CMT)

This program includes topics directed towards managing construction projects, interpreting codes and specifications, administering contracts, estimating costs, and scheduling project activities.

The objective of the Construction Management program is to provide graduates with knowledge and skills that are valued and sought by the construction industry profession. Commercial, residential, industrial, and highway/heavy sectors of the construction industry need entry-level professional employees who are knowledgeable and skilled. Graduates must have knowledge of construction materials and methods, structural systems, soils, site development, surveying, and contract administration; be capable of interpreting codes, plans, and specifications; and have skills for planning, estimating, scheduling, and evaluating project performance. The program's curriculum provides fundamental and advanced coursework that incorporate current standards and technology for managing and providing quality construction. Software is applied in curriculum courses to prepare students for careers that require a knowledge of computer estimating and scheduling.

Construction Management graduates should have knowledge and problem-solving skills to:

1. Determine costs for construction activities and projects, establish construction schedules, and apply time value of money concepts for evaluation of alternatives;
2. Evaluate project schedule and cost performance;
3. Interpret construction material properties and standards;
4. Produce and interpret drawings; interpret codes for concrete, steel, and timber construction;
5. Apply design concepts for site development (soils and foundations, water distribution, waste-water collection, and storm-water drainage); and
6. Perform managerial functions.

The program is committed to attaining the following goals:

- Provide a career-oriented program that prepares students for productive and professional employment in the construction industry.
- Emphasize inclusion of recent technological advancements into the technology/construction management curriculum in the areas of management, scheduling, estimating, cost-control, and other construction courses.
- Provide a learning environment where students apply state-of-the-art technological equipment and software.
- Prepare graduates to pursue graduate degrees and life-long education. Provide students with an opportunity to prepare for entry into the Master of Technology in Construction Management Technology program.

At the Master of Technology level, students will receive advanced education, preparing them to be construction management leaders in industry or faculty members in colleges and universities. For more information on the graduate program, please refer to the Graduate and Professional Studies catalog.

Majors in Construction Management may use no grade below C- in junior and senior level courses to satisfy major degree requirements.

Students pursuing a major in Construction Management must complete the following requirements in addition to the university core and general college requirements.

Construction Management Requirements

ACCT 2331. Accounting Principles I - Financial
CNST 1301. Construction Materials and Methods
CNST 1361. Construction Management I
