

TO: Larry Williams, Chair
Undergraduate Committee

FROM: Simon Bott, Core Curriculum Subcommittee

SUBJECT: Report for April 24th Meeting

DATE: April 24th, 2013

APPROVED APR 24 2013
as amended.

1. UC 12258 13S: Consideration of changes to catalog transfer credit policy related to core equivalencies and vocational courses

The subcommittee examined the current policy and recommended changes. There was unanimous agreement with all of the current issues. However, the subcommittee looked at the follow part of the catalog, and took issue with the fact of any mention of the fact that all evaluation is the prerogative of the faculty.

Transfer of College Credits

Evaluations of transfer work are made in the Registrar's Office, usually after students are enrolled and complete transfer records are on file. The application of transfer credit toward a degree at the university cannot be determined until the transcript has been evaluated and a degree plan is processed.

The evaluations of international transfer credits are processed by the Registrar's Office, once all required documents are submitted (complete transcripts, syllabus/catalog) during the first enrolled semester. The application of transfer credit toward a degree at the university cannot be determined until the transcript have been evaluated and a degree plan is processed.

We would like to suggest the following change to the first sentences of the above two paragraphs (and everywhere else appropriate in the catalog):

Evaluations of (international) transfer work and credit are processed by the Registrar's office after faculty in the appropriate department and college have determined whether the work and credit are of suitable content and rigor.

2. The subcommittee has examined the following courses requested for inclusion in the university core curriculum (effective 2014) and has approved them (in many cases, with minor changes). Revised documents have been obtained for all these courses.
